Prabhavit Gupta

Python Developer: Backend Architecture, APIs & Data Systems

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (CET Time Zone / EU Permanent Resident)

Summary

Python Developer with 3 years of commercial production experience designing, building, testing, and scaling backend web applications, RESTful APIs, and distributed data systems. Deep hands-on expertise in Python3 (FastAPI, asyncio, Pydantic, pytest), object-relational mapping, database modeling, and server-side business logic. Proven track record coordinating with frontend teams to integrate dynamic user-facing features, optimizing database query latency, and establishing robust automated testing suites. Based in Venice, Italy (CET time zone) with an EU Long-Term Residence Permit (permanent unrestricted EU work authorization, no sponsorship required); available immediately for full-time remote roles.

Technical Expertise

- **Python Development & Frameworks:** Python3, FastAPI, asyncio, Pydantic, Flask, pytest, object-relational mapping (ORM), object-oriented programming, data structures, algorithm optimization.
- **Backend Systems & API Design:** RESTful API development, server-side business logic, asynchronous task processing (Celery, Redis), webhook consumers, microservices architecture.
- **Databases & Data Storage:** PostgreSQL (schema design, indexing, complex analytical queries, transaction management), Redis (caching, pub/sub), JSON schema validation.
- **Testing & Code Quality:** Unit and integration testing with pytest, automated contract and regression testing with Playwright, defensive coding, performance profiling, and debugging.
- **Cloud & DevOps:** Docker containerization, Git version control, GitHub Actions, CI/CD pipeline automation, Linux environment administration.
- **Languages & Authorization:** English (C1 Professional, fluent), Hindi (Native), Italian (Conversational). EU Long-Term Residence Permit (unrestricted EU work authorization across all EU member states, no sponsorship required).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer & Python Systems Architect *London, UK (remote)*

- Architected and operated scalable Python (FastAPI) backend services and data processing pipelines for a marketplace platform serving 4,500+ active enterprise users across Europe.
- Designed relational database schemas and optimized SQL queries in PostgreSQL, eliminating execution bottlenecks and lowering API latency.
- Implemented asynchronous background job queues using Redis to handle heavy data transformation tasks outside synchronous HTTP request cycles.
- Built automated test suites using pytest and Playwright, establishing strict continuous integration gates to prevent production regressions.
- Collaborated with frontend engineers to deliver intuitive, high-performance user interfaces by defining clean, well-documented REST API specifications.
- Maintained high platform reliability through proactive structured logging, health checks, and Docker container deployments.

Urlink **Apr 2025 - Jul 2025**
Project Manager & Solutions Developer (Freelance) *Barcelona, Spain (remote)*

- Developed custom backend microservices and automated data synchronization workflows connecting external APIs to centralized relational databases.
- Built automated ETL scripts to validate, clean, and ingest multi-source partner feeds into PostgreSQL schemas.
- Partnered with client technical teams to assess requirements, prioritize feature backlogs, and deliver robust software iterations.

Independent Technical Consultant **Aug 2023 - Feb 2024**
Python Developer & Systems Integrator *Venice, Italy*

- Built and deployed custom Python automation tools, REST APIs, and database integrations for European SMB

clients.
- Developed automated data extraction scripts to replace fragile manual workflows with event-driven pipelines.
- Authored technical API documentation, database schemas, and unit test suites to facilitate seamless client handoffs.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous training in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
