Prabhavit Gupta

AI Automation Engineer | Business Workflow Auditing, AI Agents & Systems Integration

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (EU Permanent Resident | Remote Europe/UK Overlap | Immediate Availability)

Executive Summary

- **High-Impact AI Automations & Systems Delivery:** AI Automation Engineer with 3 years commercial software experience embedding within cross-functional teams to audit complex operations, translate messy manual bottlenecks into scalable automated systems, and drive measurable ROI across enterprise software products.
- **Pragmatic Stack Selection (Agents, n8n, Custom Code):** Deep expertise diagnosing operational root causes and deploying the optimal technical tier—from autonomous LLM agents (LangGraph, Model Context Protocol) and workflow orchestrators (n8n, Make) to bespoke Python microservices and event-driven API integrations.
- **End-to-End Ownership & Stakeholder Leadership:** Proven ability to manage the complete lifecycle: interviewing domain operators, mapping business processes, prototyping rapid solutions, hardening production reliability, and presenting quantifiable efficiency outcomes to leadership.

Technical Skills & Core Competencies

- **Automation & Orchestration:** n8n (Custom Nodes, Complex Error Handling), Make, Zapier, LangGraph, Model Context Protocol (MCP), Event-Driven Architecture, Webhooks, Celery, Redis Queues.
- **AI & LLM Engineering:** Anthropic Claude, OpenAI SDK, Google Gemini, Structured Output Extraction (Pydantic), Function Calling, Context Pruning, Dynamic Prompt Templates, Automated Evaluation Suites (DeepEval).
- **Software Development & APIs:** Python 3.11+, FastAPI, TypeScript / Node.js, RESTful & GraphQL APIs, PostgreSQL, SQL Optimization, Docker, Git, CI/CD Workflows.
- **Business Process Engineering:** Workflow Auditing, Value Stream Mapping, Root Cause Diagnosis, Idempotency & Dead-Letter Recovery, Secrets Hygiene, Role-Based Access Control (RBAC).
- **Cloud & Infrastructure:** Google Cloud Platform (Cloud Run, Cloud Tasks, Pub/Sub), AWS (Lambda, ECS, S3), Linux / Bash, Prometheus / Grafana Telemetry.

Professional Experience

Lead AI Automation Consultant & Engineer • *Self-Employed / Independent AI Automation Consultancy*
Oct 2024 – Present • Remote

- Embedded across client organizations to audit manual operations in customer support, invoicing, and reporting, establishing prioritized automation roadmaps that eliminated 15+ weekly hours of repetitive work per squad.
- Architected and shipped 25+ production automations integrating CRMs, ERPs, ticketing engines, and LLM reasoning agents, achieving 99.4% execution reliability through transactional idempotency and automated retry handlers.
- Designed autonomous extraction pipelines utilizing Claude and Gemini to transform unstructured contracts, PDFs, and inbound emails into validated database entities, cutting processing cycle times by 80%.
- Partnered directly with C-suite and department heads to communicate operational metrics, cost-per-execution savings, and automation playbooks, driving high user adoption.
- Implemented continuous testing and evaluation harnesses with DeepEval, ensuring zero regression across automated business rules during model or prompt upgrades.

AI Software Engineer • *Freelance & Enterprise Client Projects*
Jan 2023 – Sep 2024 • Remote / Hybrid

- Implemented automated data ingestion, normalization, and reconciliation workflows connecting disparate third-party SaaS APIs with internal PostgreSQL databases.
- Built conversational support bots and internal productivity agents with tool-calling capabilities, allowing internal employees to query operational databases via natural language.
- Containerized microservices using Docker and orchestrated automated deployment pipelines with GitHub Actions, ensuring zero-downtime releases.
- Configured enterprise-grade observability and logging with Prometheus and OpenTelemetry, establishing automated alerts for webhook failure rates and latency anomalies.
- Authored step-by-step developer documentation and user training guides, empowering operational teams to maintain self-serve automation templates independently.

Featured Systems & Operational Implementations

Multi-Tenant Vertical SaaS Workflow Automation Suite • *Lead Engineer*
Production Implementation • 2025

- Engineered an automated customer onboarding and data ingestion engine using n8n and FastAPI, decreasing client time-to-value from 5 business days to under 4 hours.

- Built automated error-triage workflows with Slack notification bridges, allowing engineers to resolve API sync exceptions with one-click resolution triggers.

Autonomous Agent Tool Execution Gateway (MCP) • *Creator*
Open-Source Reference • 2024 – 2025

- Implemented an extensible Model Context Protocol (MCP) server connecting LLM reasoning engines to enterprise back-office systems with strict permission validation and comprehensive audit logging.
- Ensured complete data privacy and GDPR compliance by incorporating automated PII redaction filters prior to external model API dispatch.

Education, Credentials & Languages

- **Bachelor of Arts in Philosophy & Economics** • Ca' Foscari University of Venice (Coursework in Formal Logic, Systems Thinking & Quantitative Decision Analysis)
- **Languages:** English (C1 – Full Professional Proficiency), Italian (Working Proficiency), Hindi (Native)
- **Work Authorization:** EU Permanent Resident (Permesso di Soggiorno UE a Tempo Indeterminato, Italy) • Remote contractor / Freelance ready • Available immediately (0 days notice).
