Prabhavit Gupta

Agent Solutions Engineer | Voice AI Agents, Custom Deployments & Solutions Architecture

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (EU Permanent Resident | Open to Relocation to SF)

Executive Summary

- **Agent Solutions Engineering & Deployments:** Solutions-focused software engineer with 3 years commercial software experience translating ambiguous enterprise workflows into production-ready AI agents, voice integrations, and automated pipelines.
- **Voice AI, Tool Calling & Integration Depth:** Hands-on expertise connecting conversational models to enterprise backends, orchestrating webhooks, stateful session runners, real-time WebSockets, Model Context Protocol (MCP) tool loops, and handling edge cases in live customer environments.
- **High-Agency Execution & Customer Partnership:** Experienced in driving customer engagements end-to-end – from discovery and rapid POC prototyping to production deployment, reliability benchmarking, and cross-functional technical enablement.

Technical Skills & Core Competencies

- **Solutions Engineering & Delivery:** Solution Architecture, Rapid Agent Prototyping, Technical Discovery Calls, Customer Onboarding, API Integration Design, Production Rollouts, Technical Training & Enablement.
- **AI Agents & Voice Workflows:** Conversational Voice Agents, Autonomous Agent Tool Calling, Webhook Routing, Model Context Protocol (MCP), Structured Outputs (Pydantic, Zod), Automated Evals (DeepEval, Langfuse).
- **Software Development:** Python (AsyncIO, Requests, PyTest), TypeScript, Node.js, Next.js, Laravel, REST APIs, WebSockets, SQL (PostgreSQL, SQLite), Docker, Git.
- **Operations & Developer Tooling:** Postman, GitHub Actions, CI/CD, Distributed Tracing (Langfuse), Linux CLI, Agile/Jira, Technical Documentation.

Professional Experience

AI Solutions Engineer & Agent Systems Consultant • *Independent Consultancy*
2024 – Present • Venice, IT (Remote / Hybrid)

- Partnered directly with enterprise customer stakeholders to understand operational pain points, translating fuzzy business goals into functioning, production-ready AI agent architectures.
- Built custom agent prototypes integrating live external APIs, database lookups, and telephony/web conversational interfaces with strict latency and accuracy guardrails.
- Engineered robust webhook handlers and middleware services in Python and TypeScript, ensuring reliable payload synchronization and state management under heavy traffic.
- Guided client technical and operations teams through onboarding, conducting hands-on training sessions and authoring tailored reference implementations to accelerate adoption.
- Monitored production agent interactions with Langfuse tracing, tracking task completion rates, conversational latency, and tool dispatch fidelity to continuously refine prompts and tool schemas.

Lead Developer & Product Engineer • *FlowSpace.co*
Mar 2024 – Aug 2026 • London, UK (Remote)

- Led technical implementation and integration architecture, scaling the platform from 2,000 to 4,500+ active users across European markets.
- Re-architected application stack off legacy infrastructure onto Next.js and Laravel, maintaining complete data fidelity and zero downtime.
- Deployed automated conversational customer support agents connected to live booking databases, reducing human support overhead while maintaining high satisfaction.
- Built automated data ingestion and extraction pipelines aggregating unstructured venue inventory across multiple European platforms.
- Integrated third-party management APIs (OfficeRnD, Nexudus) for automated booking orchestration via real-time webhooks.

Full-Stack Solutions Engineer • *Tech Automation Systems*
2023 – 2024 • Milan / Remote, IT

- Built automated backend services and API connectors in Python and TypeScript, synchronizing enterprise CRM and transactional data warehouses.
- Developed automated testing suites and CI/CD deployment pipelines in Docker, establishing reliable integration baselines.
- Collaborated directly with business users to map operational processes and design tailored automation solutions.

Key Engineering Projects

- **Autonomous Tool-Calling & Evaluation Harness (TypeScript + MCP + Langfuse):** Architected an execution harness enabling LLMs to safely invoke external tools, validating payloads against strict schemas with automated tracing and regression metrics.
- **Universal Multi-Source Ingestion Pipeline (Python + Playwright + REST APIs):** Designed an automated data harvesting and enrichment system parsing 900+ structured and semi-structured external sources with schema validation and error isolation.

Education, Languages & Legal Status

- **Bachelor of Arts in Philosophy, International Studies & Economics** – Ca' Foscari University of Venice (2020 – 2024)
  Rigorous foundation in formal logic, epistemology, decision theory, and complex systems analysis.
- **Languages:** English (C1 Full Professional / Fluent), Italian (Working proficiency), Hindi (Native).
- **Legal Status & Availability:** EU Long-Term Resident (Permesso di Soggiorno UE a Tempo Indeterminato, Italy). Open to international relocation to San Francisco with visa sponsorship; available immediately.
