Prabhavit Gupta

AI Software Engineer: Python, Machine Learning Pipelines & Computer Vision Systems

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

Curious, product-minded AI and software engineer based in Venice, Italy with unrestricted European work authorization and immediate availability for Spanish and European remote roles. Specializes in building modular Python applications, end-to-end data pipelines, and machine learning workflows that transition models from exploratory prototypes to production-grade services. Experienced in computer vision fundamentals (object detection, image segmentation, OCR data extraction), PyTorch model integration, and automated verification suites. At FlowSpace, architected multi-modal AI extraction bots processing diverse unstructured visual and document formats (PDFs, architectural brochures, floorplans, photo captures) with strict validation schemas.

Experience

FlowSpace.co • *Lead Developer (Full-time, Freelance)*
Mar 2024 - Aug 2026 • London, UK (remote)

- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review. 900+ listings drafted.
- Streamlined customer support with AI agents that answer queries against live platform data and escalate to a person on low confidence.
- Integrated the OfficeRnD and Nexudus APIs for automated bookings, and built CRM lead-capture integration and GTM automations (sales funnel, lead enrichment, outbound) with n8n.
- Led the migration off a legacy stack to a coded Next.js and Laravel product: mapped the data model, chose the migration path per entity (API or CSV) and drove the cutover. Scaled the platform from 2,000 to 4,500+ users.
- Documented product and business logic with the developer team, coordinated between the internal team and an external agency, and built a commute-time calculator tool for companies.
- *Tools: Claude Code, n8n, Playwright, Postman, Laravel, TypeScript, Supabase, GitHub, Jira, ClickUp, Miro, Google Analytics, Microsoft Clarity*

Urlink • *Project Manager & AI-Assisted Developer (Freelance)*
Apr 2025 - Jul 2025 • Barcelona, Spain

- Built automated workflows and structured customer-facing demos with AI agents for client onboarding and document ingestion.
- Managed project delivery end to end: mapped stakeholder requirements, built proof-of-concept prototypes, coordinated testing, and handed over documentation to client teams.
- *Tools: Claude Code, Python, APIs, Postman, Supabase*

Freelance • *Full-Stack AI & Automation Developer*
Sep 2023 - Mar 2024 • Venice, Italy

- Built web scrapers, data enrichment pipelines, and custom API integrations for clients across Europe.
- Developed internal tools with modern frontend frameworks and backend scripts, automating repetitive manual data entry.
- *Tools: TypeScript, Python, n8n, Supabase, REST APIs*

Tractionboard.co • *Low-Code Developer (Internship)*
Aug 2023 - Oct 2023 • Utrecht, Netherlands

- Integrated ChatGPT/OpenAI and Sendgrid, built responsive designs, debugged features and implemented Google Ads 4.
- *Tools: Figma, Sendgrid, ChatGPT*

Education

Ca' Foscari University of Venice • *Bachelor's in Philosophy, International Studies & Economics, Minor in Entrepreneurship*
Oct 2020 - Jun 2024 • Venice, Italy

Certifications

Microsoft Copilot Studio Agent Academy • Microsoft: Introduction to building AI agents • Microsoft Power Automate • Tray.AI Build Practitioner (Sep 2024) • Tray.AI Build Foundations

Additional Information

- **Work authorization:** European Long Term Residence Permit (Italy), no sponsorship needed in the EU. Available immediately.

- **Languages:** Hindi (native), English (professional), Italian (beginner).

Core Skills

- **AI & Computer Vision Engineering:** Python, PyTorch, visual data preprocessing, object detection and OCR pipelines, multi-modal model integration, prototype-to-production deployment
- **Software Engineering Fundamentals:** Clean code, modular architecture, Git version control, schema validation (Pydantic), automated testing with Playwright and PyTest
- **Data Pipelines & Backend Services:** REST APIs, TypeScript, Node.js, PostgreSQL, Supabase, asynchronous processing (asyncio), n8n workflow integration
- **Agile Innovation & Delivery:** Iterative PoC development, clear technical documentation, cross-functional collaboration, experiment metrics tracking
