Prabhavit Gupta

AI-First QA Engineer: Playwright Automation, TypeScript & Agentic Systems

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (EU Permanent Resident / Global Remote Ready)

Summary

QA Automation and AI Systems Engineer with 3 years of hands-on production experience architecting end-to-end test automation frameworks, regression test suites, and AI evaluation pipelines. Deep expertise in Playwright (TypeScript/Python), API contract verification, and automated regression testing for customer-facing AI agents and distributed web applications. Proven track record embedding AI-driven testing workflows to accelerate test design, automate scenario coverage, and validate non-deterministic LLM behavior against ground-truth benchmarks. Holder of an EU Long-Term Residence Permit (permanent unrestricted EU work authorization across all EU member states, no sponsorship required); based in Venice, Italy and available immediately for remote roles.

Technical Expertise

- **Test Automation Frameworks:** Playwright (TypeScript & Python), End-to-End (E2E) testing, API contract testing, component testing, regression test suite maintenance, headless CI browser automation.
- **AI-First Quality Assurance & Evaluation:** LLM evaluation harnesses, transcript verification, ground-truth benchmark datasets, hallucination and grounding detection, AI coding tools (Claude Code, GitHub Copilot).
- **Software Development & Programming:** TypeScript, Python, Node.js, RESTful API testing (Playwright API, Postman), JSON schema validation, asynchronous execution patterns.
- **DevOps & Version Control:** Git branching workflows, GitHub Actions / CI/CD pipelines, Docker containerization, test reporting, error logging and root-cause analysis.
- **Languages & Work Authorization:** English (C1 Professional, fluent), Hindi (Native), Italian (Beginner). EU Long-Term Residence Permit (unrestricted EU work authorization across all EU member states, no sponsorship required).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer & AI Systems Architect *London, UK (remote)*

- Architected and maintained comprehensive automated test suites using Playwright and TypeScript for a platform serving 4,500+ active enterprise users, covering UI flows, authentication, and REST APIs.
- Built specialized automated evaluation harnesses to test customer-facing AI agents and RAG pipelines against ground-truth datasets, systematically catching regressions in reasoning and tool-calling schemas.
- Integrated automated Playwright test execution into CI/CD pipelines, achieving high test reliability, flake reduction, and zero functional regressions across continuous deployment releases.
- Implemented schema validation pipelines for document parsing and data ingestion, ensuring inbound partner payloads adhered strictly to expected data contracts.
- Partnered closely with engineering and product teams to define test plans, triage production incident reports, and implement preventive regression checks.

Urlink **Apr 2025 - Jul 2025**
Project Manager & Solutions Developer (Freelance) *Barcelona, Spain (remote)*

- Led technical discovery and implementation of customized web solutions and automated data processing pipelines for European client platforms.
- Established automated API validation suites and integration checks connecting third-party partner APIs to PostgreSQL databases, guaranteeing data consistency.
- Built functional prototypes and test environments to validate edge cases and user journeys prior to full sprint development.

Independent Technical Consultant **Aug 2023 - Feb 2024**
AI Automation & Integration Developer *Venice, Italy*

- Developed and deployed custom automated integration test scripts, webhook listeners, and LLM extraction pipelines using TypeScript, Python, and n8n.
- Replaced brittle manual verification processes with automated regression test flows, featuring robust retry mechanisms, error alerting, and structured reporting.

- Documented testing procedures, test coverage matrices, and API contracts for client engineering teams.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous training in formal logic, epistemology, analytical problem solving, and complex systems analysis.
