Prabhavit Gupta

Fullstack Engineer, AI Implementation: React, TypeScript, Python & Production Systems

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (EU / Remote)

Summary

Fullstack Engineer and Lead Developer with 3 years of hands-on production experience designing, integrating, and operating full-stack applications and AI-driven features across European tech products. Proven track record owning the end-to-end integration flow: gathering platform context, connecting AI service endpoints with robust error handling and fallback behaviors, and building intuitive React/Next.js interfaces that translate structured model outputs into clear, actionable UI workflows. Expert at instrumenting evaluation loops over real production execution traces, profiling latency and token spend, and writing comprehensive Playwright automated test suites. Holder of EU Long-Term Residence Permit (permanent unrestricted EU work authorization, no visa sponsorship required); based in Venice, Italy and available immediately.

Technical Expertise

- **Frontend Engineering & UI Architecture:** TypeScript, JavaScript, React, Next.js, responsive UI components, state management, mapping complex AI insights to interactive workflows.
- **AI Implementation & Endpoint Integration:** Claude API, OpenAI API, function calling, structured JSON output extraction, context gathering pipelines, prompt engineering, fallback & retry logic.
- **Backend Systems & APIs:** Python, Node.js, PHP/Laravel, RESTful API design, webhook synchronization, authentication flows, error handling boundaries.
- **Data Modeling & Datastores:** PostgreSQL, Prisma, Supabase, MySQL, relational schema migrations, data transformation pipelines, Redis caching.
- **Testing, Quality & Observability:** End-to-end automated testing with Playwright, evaluation loops over live interaction traces, latency profiling, Git, CI/CD pipelines.
- **Languages & Authorization:** English (C1 Professional), Hindi (Native), Italian (Beginner). EU Long-Term Residence Permit (permanent unrestricted EU work authorization, no visa sponsorship required).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer & AI Systems Architect *London, UK (remote)*

- Architected, deployed, and maintained the production AI customer support agent runtime on a live platform serving 4,500+ active users, automating customer inquiries across pricing, venue inventory, and bookings.
- Grounded agent responses against live operational databases and partner APIs (OfficeRnD, Nexudus) using strict JSON tool schemas and fallback escalation logic that routed complex inquiries to staff.
- Built automated evaluation loops analyzing real customer conversation transcripts rather than synthetic benchmarks, systematically detecting failure patterns and eliminating hallucinated answers.
- Profiled latency and API token consumption across model versions, optimizing prompt templates and context window utilization to reduce inference costs while maintaining rapid response times.
- Deployed automated end-to-end regression test suites using Playwright, verifying API contracts and continuous deployment stability across end-to-end customer booking flows.
- Spearheaded platform migration from legacy architecture to a modern Next.js and backend service stack, supporting platform growth from 2,000 to 4,500+ users without operational degradation.
- Built automated data ingestion and transformation pipelines parsing and validating unstructured partner listings, expanding platform inventory to over 900 locations.

Urlink **Apr 2025 - Jul 2025**
Project Manager & Solutions Developer (Freelance) *Barcelona, Spain (remote)*

- Architected core web application backend workflows, defining clear API contracts, relational schemas, and data transformation logic for client-facing features.
- Implemented automated validation and synchronization pipelines connecting third-party services with PostgreSQL, preventing malformed inputs and ensuring relational data integrity.
- Integrated automated CI/CD workflows and regression checks to accelerate feature delivery across distributed development environments.

Independent Technical Consultant **Aug 2023 - Feb 2024**

AI Solutions & Automation Engineer *Venice, Italy*

- Designed and delivered bespoke AI automation workflows, web extraction engines, and API integrations for European SME clients using Python, TypeScript, and Playwright.
- Translated manual, fragmented business operations into automated software solutions with structured logging, retry queues, and reliable recovery logic.
- Engineered webhook listeners and real-time synchronization pipelines across CRM platforms, operational tools, and relational datastores.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous grounding in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
