Summary

Engineer with about three years of experience building with LLM APIs and AI coding agents, and working directly with customers and developers. Claude Code is my main way of working, and I review and test what it produces. At FlowSpace I built support agents with tool use that answer against live platform data and escalate to a person on low confidence, an LLM ingestion pipeline with human review (900+ listings drafted), and OfficeRnD and Nexudus integrations over REST APIs, webhooks and OAuth. I use MCP, troubleshoot integrations with customers, and write TypeScript and Python at working level. Based in Venice, available immediately for remote work in EMEA.

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review. 900+ listings drafted.
- Streamlined customer support with AI agents that answer queries against live platform data and escalate to a person on low confidence.
- Integrated the OfficeRnD and Nexudus APIs for automated bookings, and built CRM lead-capture integration and GTM automations (sales funnel, lead enrichment, outbound) with n8n.
- Led the migration off a legacy stack to a coded Next.js and Laravel product: mapped the data model, chose the migration path per entity (API or CSV) and drove the cutover. Scaled the platform from 2,000 to 4,500+ users.
- Documented product and business logic with the developer team, coordinated between the internal team and an external agency, and built a commute-time calculator tool for companies.
- *Tools: Claude Code, n8n, Playwright, Postman, Laravel, TypeScript, Supabase, GitHub, Jira, ClickUp, Miro, Google Analytics, Microsoft Clarity*

Urlink **Apr 2025 - Jul 2025**
