Prabhavit Gupta

Solutions Engineer: Zero-Trust Networking, Cloud Infrastructure & Customer Architecture

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (Relocating to Berlin, Germany)

Summary

Customer-facing Solutions Engineer and Lead Developer with 3 years of hands-on production experience architecting distributed software, hybrid cloud integrations, and secure network workflows. Proven track record leading customer engagements end-to-end—from initial technical discovery and architecture design through hands-on proof-of-concept (PoC) delivery, objection handling, and smooth customer onboarding. Technically versed in networking fundamentals (DNS, routing, tunneling, access control, zero-trust network architectures) and modern cloud/containerized environments (Docker, Linux, AWS, GCP). Combines deep systems literacy in TypeScript, Python, REST APIs, and automation tooling with strong commercial empathy to translate complex infrastructure requirements into high-impact, working solutions. Holder of EU Long-Term Residence Permit (permanent unrestricted EU work authorization in Germany and across all EU member states without visa sponsorship); based in Venice, Italy and prepared for immediate relocation to Berlin.

Technical Expertise

- **Solutions Engineering & Customer Architecture:** Technical discovery, objection handling, tailored PoCs and pilot execution, live architecture demonstrations, solution design, onboarding runbooks.
- **Networking & Secure Infrastructure:** DNS, routing topologies, tunneling and overlay mesh networks (WireGuard, zero-trust network access), firewalling, access control, Linux administration.
- **Cloud & Containerization:** Docker, hybrid infrastructure deployments, AWS, GCP, reverse proxies, CI/CD automated deployment pipelines.
- **Full-Stack & Backend Engineering:** TypeScript, Node.js, Python (FastAPI), RESTful API design, webhook sync architectures, PostgreSQL, structured data validation.
- **Applied Automation & Testing:** Automated integration testing (Playwright), event-driven pipelines, telemetry logging, workflow orchestration (n8n).
- **Languages & Authorization:** English (C1 Professional), Hindi (Native), Italian (Beginner). EU Long-Term Residence Permit (permanent unrestricted work authorization across Germany/EU, no visa sponsorship needed).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer & Integration Architect *London, UK (remote)*

- Led end-to-end technical customer integration architecture for a live B2B platform serving 4,500+ active users, translating partner requirements into reliable API integrations and automated workflows.
- Designed and deployed secure API gateway integrations and webhook ingestion services connecting third-party platforms (OfficeRnD, Nexudus) with PostgreSQL datastores under strict data integrity constraints.
- Conducted technical solution demos and integration troubleshooting sessions with external enterprise partners, establishing standardized implementation patterns that slashed onboarding time.
- Engineered automated monitoring, structured telemetry, and fallback routing mechanisms, ensuring continuous system availability and fast diagnosis of network/API latency spikes.
- Built automated regression suites and deployment verifications using Playwright and Docker, validating infrastructure changes before release and preventing integration drift.
- Spearheaded system architecture modernization to a Next.js and containerized backend stack, scaling operational throughput from 2,000 to 4,500+ users without performance bottlenecks.

Urlink **Apr 2025 - Jul 2025**
Project Manager & Solutions Developer (Freelance) *Barcelona, Spain (remote)*

- Directed technical discovery and backend workflow architecture for customer-facing web applications, aligning technical scope with client delivery schedules.
- Engineered secure, schema-validated synchronization pipelines connecting distributed third-party APIs with core PostgreSQL databases.
- Implemented CI/CD deployment pipelines and automated integration validation, eliminating deployment regressions across multi-developer environments.

Independent Technical Consultant **Aug 2023 - Feb 2024**

Solutions & Automation Engineer *Venice, Italy*

- Designed and implemented bespoke infrastructure automations, API integration connectors, and secure web services for European SME clients using Python and TypeScript.
- Partnered directly with non-technical business owners to diagnose operational friction, author solution specs, and deliver functional prototypes within rapid turnaround cycles.
- Built resilient webhook listeners and multi-system synchronization tools featuring automated retry logic, exponential backoff, and end-to-end observability.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous training in analytical problem solving, formal logic, systems design, and economic decision modeling.
