Summary

AI automation and systems engineer with about three years of experience building multi-step agent orchestration pipelines, external workflow automation (n8n), and database-backed UI integrations. At FlowSpace, engineered an end-to-end LLM document and content ingestion pipeline processing 900+ assets with human-in-the-loop QA, built customer support AI agents against live platform data, and integrated Supabase/PostgreSQL backends with external APIs (OfficeRnD, Nexudus, CRMs). Daily power user of Claude Code and Cursor for building modular, production-ready automation systems. Fully based in Europe (Venice, Italy) with unrestricted EU work authorization; available immediately.

Experience

FlowSpace.co • *Lead Developer (Full-time, Freelance)*
Mar 2024 - Aug 2026 • London, UK (remote)

- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review. 900+ listings drafted.
- Streamlined customer support with AI agents that answer queries against live platform data and escalate to a person on low confidence.
- Integrated the OfficeRnD and Nexudus APIs for automated bookings, and built CRM lead-capture integration and GTM automations (sales funnel, lead enrichment, outbound) with n8n.
- Led the migration off a legacy stack to a coded Next.js and Laravel product: mapped the data model, chose the migration path per entity (API or CSV) and drove the cutover. Scaled the platform from 2,000 to 4,500+ users.
- Documented product and business logic with the developer team, coordinated between the internal team and an external agency, and built a commute-time calculator tool for companies.
- *Tools: Claude Code, n8n, Playwright, Postman, Laravel, TypeScript, Supabase, GitHub, Jira, ClickUp, Miro, Google Analytics, Microsoft Clarity*

Urlink • *Project Manager & AI-Assisted Developer (Freelance)*
Apr 2025 - Jul 2025 • Barcelona, Spain

- Built automated workflows and structured customer-facing demos with AI agents for client onboarding and document ingestion.
- Managed project delivery end to end: mapped stakeholder requirements, built proof-of-concept prototypes, coordinated testing, and handed over documentation to client teams.
- *Tools: Claude Code, Python, APIs, Postman, Supabase*

Freelance • *Full-Stack AI & Automation Developer*
Sep 2023 - Mar 2024 • Venice, Italy

- Built web scrapers, data enrichment pipelines, and custom API integrations for clients across Europe.
- Developed internal tools with modern frontend frameworks and backend scripts, automating repetitive manual data entry.
- *Tools: TypeScript, Python, n8n, Supabase, REST APIs*

Tractionboard.co • *Low-Code Developer (Internship)*
Aug 2023 - Oct 2023 • Utrecht, Netherlands

- Integrated ChatGPT/OpenAI and Sendgrid, built responsive designs, debugged features and implemented Google Ads 4.
