Prabhavit Gupta

Automation Engineer: Agentic Orchestration, Autonomous Workflows & LLM Systems

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

Automation and software engineer with hands-on experience building autonomous agentic orchestration systems, multi-step LLM workflows, and enterprise API integrations. At FlowSpace, engineered end-to-end AI agent architectures handling multi-modal document extraction and listing generation (900+ assets drafted), deployed live customer support agents with automated confidence routing and human escalation gates, and built resilient API integrations and GTM automation pipelines. Experienced with LangChain, LlamaIndex, Python asyncio, structured tool-calling, PostgreSQL/Supabase data layers, and production evaluation loops. Based in the EU (Venice, Italy) with unrestricted European work authorization; available immediately.

Experience

FlowSpace.co • *Lead Developer (Full-time, Freelance)*
Mar 2024 - Aug 2026 • London, UK (remote)

- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review. 900+ listings drafted.
- Streamlined customer support with AI agents that answer queries against live platform data and escalate to a person on low confidence.
- Integrated the OfficeRnD and Nexudus APIs for automated bookings, and built CRM lead-capture integration and GTM automations (sales funnel, lead enrichment, outbound) with n8n.
- Led the migration off a legacy stack to a coded Next.js and Laravel product: mapped the data model, chose the migration path per entity (API or CSV) and drove the cutover. Scaled the platform from 2,000 to 4,500+ users.
- Documented product and business logic with the developer team, coordinated between the internal team and an external agency, and built a commute-time calculator tool for companies.
- *Tools: Claude Code, n8n, Playwright, Postman, Laravel, TypeScript, Supabase, GitHub, Jira, ClickUp, Miro, Google Analytics, Microsoft Clarity*

Urlink • *Project Manager & AI-Assisted Developer (Freelance)*
Apr 2025 - Jul 2025 • Barcelona, Spain

- Built automated workflows and structured customer-facing demos with AI agents for client onboarding and document ingestion.
- Managed project delivery end to end: mapped stakeholder requirements, built proof-of-concept prototypes, coordinated testing, and handed over documentation to client teams.
- *Tools: Claude Code, Python, APIs, Postman, Supabase*

Freelance • *Full-Stack AI & Automation Developer*
Sep 2023 - Mar 2024 • Venice, Italy

- Built web scrapers, data enrichment pipelines, and custom API integrations for clients across Europe.
- Developed internal tools with modern frontend frameworks and backend scripts, automating repetitive manual data entry.
- *Tools: TypeScript, Python, n8n, Supabase, REST APIs*

Tractionboard.co • *Low-Code Developer (Internship)*
Aug 2023 - Oct 2023 • Utrecht, Netherlands

- Integrated ChatGPT/OpenAI and Sendgrid, built responsive designs, debugged features and implemented Google Ads 4.
- *Tools: Figma, Sendgrid, ChatGPT*

Education

Ca' Foscari University of Venice • *Bachelor's in Philosophy, International Studies & Economics, Minor in Entrepreneurship*
Oct 2020 - Jun 2024 • Venice, Italy

Certifications

Microsoft Copilot Studio Agent Academy • Microsoft: Introduction to building AI agents • Microsoft Power Automate • Tray.AI Build Practitioner (Sep 2024) • Tray.AI Build Foundations

Additional Information

- **Work authorization:** European Long Term Residence Permit (Italy), no sponsorship needed in the EU. Available immediately.

- **Languages:** Hindi (native), English (professional), Italian (beginner).

Core Skills

- **Agentic Orchestration & AI:** Autonomous agent systems, LangChain, LlamaIndex, context design, prompt engineering, structured tool-calling, RAG pipelines, human-in-the-loop review, automated evaluation systems
- **System Integration & APIs:** Custom connectors, REST/GraphQL endpoints, SSE, WebSockets, webhook pipelines, middleware, multi-service contract design, retry and fault tolerance
- **Backend & Data Infrastructure:** Python (asyncio), TypeScript, PostgreSQL (schema design, indexing, migrations), Supabase, vector embeddings, Docker, Docker Compose
- **Automation & Tooling:** n8n orchestration, Playwright test automation, Postman, OpenTelemetry tracing, Claude Code, Cursor, Git/GitHub, Jira
