# Prabhavit Gupta

Applied AI Architect | Claude Ecosystem, Model Context Protocol (MCP) & Enterprise Solutions

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit-gupta | github.com/prab-gupta
| Venice / Milan, Italy (EU Permanent Resident | Full Italian Work Authorization)

## Executive Summary

- **Applied AI Architecture & Enterprise Claude Adoption:** Applied AI solutions engineer with 3 years commercial software experience guiding enterprise clients through LLM architecture design, technical discovery, and safe production deployment of AI systems.
- **Model Context Protocol (MCP) & Tool Execution Ecosystems:** Deep practical expertise architecting MCP servers and clients, tool-calling pipelines, structured context engineering, and sandboxed runtimes connecting frontier models to complex enterprise endpoints.
- **Rigorous Evaluations & AI Safety Guardrails:** Experienced in constructing quantitative evaluation testbeds (LLM-as-a-judge, prompt sensitivity, groundedness evals with Langfuse/DeepEval) and partnering with technical and C-suite stakeholders to ensure deterministic, steerable outcomes.

## Technical Skills & Core Competencies

- **Claude Stack & Applied AI Architecture:** Claude API, Model Context Protocol (MCP), Context Engineering, Prompt Caching, Extended Thinking, Tool Calling, Vector Databases (Qdrant, pgvector), Hybrid RAG Pipelines.
- **Evaluation & Observability:** LLM-as-a-Judge, Steerability Benchmarking, DeepEval, Langfuse Distributed Tracing, Hallucination Audits, Automated Regression Test Suites.
- **Technical Solutions & Pre-Sales Consulting:** Enterprise Discovery, Proof-of-Concept (POC) Delivery, Reference Architectures, C-Suite Technical Presentations, Technical Mentorship.
- **Core Software Engineering:** Python (FastAPI, AsyncIO, PyTest), TypeScript / Node.js, Next.js, Docker, PostgreSQL, REST/GraphQL APIs, Git.

## Professional Experience

**Applied AI Solutions Architect & Technical Consultant** • *Independent Consultancy*
2024 – Present • Venice / Milan, IT (Remote / Hybrid)

- Advised enterprise leadership and engineering teams across Italy and Europe on adopting frontier LLM capabilities, scoping technical requirements, and deploying production AI integrations.
- Architected end-to-end integration patterns utilizing the Model Context Protocol (MCP), enabling models to securely query live internal databases and execute business actions within audited boundaries.
- Designed comprehensive evaluation frameworks measuring domain accuracy, safety boundaries, and prompt stability across production customer workloads before deployment.
- Developed and delivered technical demonstrations, reference architectures, and deep-dive architectural workshops for both developer teams and executive stakeholders.
- Guided clients through enterprise security, data privacy, and compliance reviews, establishing safe deployment practices for sensitive business data.

**Lead Developer & Product Engineer** • *FlowSpace.co*
Mar 2024 – Aug 2026 • London, UK (Remote)

- Led platform integration architecture and core engineering, scaling user traffic across UK and European enterprise hubs from 2,000 to 4,500+ active professionals.
- Designed and shipped conversational AI support agents integrated with live reservation systems, resolving unstructured inquiries with high resolution accuracy.
- Modernized platform infrastructure into modular Next.js and backend API microservices, eliminating architectural bottlenecks and ensuring continuous 99.9% availability.
- Built resilient multi-source data extraction and ingestion pipelines normalizing external inventory feeds across disparate third-party formats.
- Collaborated with external venue operations partners, translating complex operational workflows into dependable API integrations and automated webhook triggers.

**Full-Stack Solutions Engineer** • *Tech Automation Systems*
2023 – 2024 • Milan / Remote, IT

- Delivered custom API integrations and automated backend microservices in Python and TypeScript connecting client platforms with internal operational databases.
- Implemented automated unit and end-to-end integration tests within CI/CD pipelines, preventing breaking changes across shared external interfaces.
- Partnered directly with non-technical business clients to extract domain requirements and deliver clean, testable

software solutions on aggressive timelines.

## Key Engineering Projects

- **Autonomous Tool-Calling & Evaluation Harness (TypeScript + MCP + Langfuse):** Architected an enterprise agent runtime enabling LLMs to safely invoke external tool ecosystems with schema-enforced payload validation, full state rollbacks, and distributed tracing.
- **Universal Multi-Source Ingestion Pipeline (Python + Playwright + REST APIs):** Designed an automated data harvesting and enrichment system parsing 900+ structured and semi-structured external sources with schema validation and error isolation.

## Education, Languages & Legal Status

- **Bachelor of Arts in Philosophy, International Studies & Economics** – Ca' Foscari University of Venice (2020 – 2024)
  *Rigorous foundation in formal logic, epistemology, decision theory, and complex systems analysis.*
- **Languages:** English (C1 Full Professional / Fluent), Italian (Working proficiency), Hindi (Native).
- **Legal Status & Availability:** EU Long-Term Resident (Permesso di Soggiorno UE a Tempo Indeterminato, Italy). Full Italian work rights; based in Venice, easily commuting to Milan (25%+ on-site); no visa sponsorship required for Italy.
