Motivation letter for Application for Artificial Intelligence Engineer – Venezia, Italy

Dear Hiring Manager,

I am writing to express my strong interest in the Artificial Intelligence Engineer position at Arsenalia. As an AI Solutions and Automation Engineer based in Venice, I have been closely following Arsenalia and its growth trajectory. Arsenalia's "Make AI Real" methodology and specifically the strategic transition from standard generative models to dynamic Agentic Enterprise solutions aligns perfectly with my professional expertise in LLM orchestration, rapid prototyping, and complex API integration.

Over the past three years, I have successfully transformed abstract business requirements into production-ready features across multiple European technology projects spanning different countries and sectors; from a sports management platform in Luxembourg to strategic consultant platforms in France and Spain. Operating extensively as an AI Solutions Developer, I engineered AI-based data parsing tools using n8n for UltraStrategy, automated complex workflows for Get2Germany, and executed rigorous quality assurance and API integrations for Clubee.

During my tenure at FlowSpace, I managed system integrations, GTM automations, and engineered AI agents and automated data parsing tools that directly contributed to scaling the platform from 2,000 to over 4,500 active users.

My daily engineering workflow revolves around the exact requirements outlined in your role: I utilize prompt chaining, RAG architectures, and workflow orchestration tools to connect external APIs with foundational models like OpenAI, Anthropic Claude, and Azure OpenAI. Furthermore, the role's emphasis on experimentation, rapid prototyping, and AI-assisted development workflows speaks directly to my core methodology. I extensively leverage AI coding assistants alongside modern frameworks (TypeScript, Next.js, Node.js) to rapidly test hypotheses and deploy MVP architectures, and I recently completed advanced coursework in Microsoft Copilot and AI agent orchestration.

As a graduate of Ca' Foscari University, I have been living in Venice for 5 years, hold a European Long-Term Residence Permit requiring no visa sponsorship, and have the professional English proficiency required for international collaboration. I am also fully available for short- and medium-term business travel as project demands.

I would welcome the opportunity to discuss how my practical background in orchestrating AI capabilities and automating complex data workflows can immediately contribute to your team of experts at Arsenalia. Thank you for your time and consideration.

Sincerely,

Prabhavit Gupta
