Summary

Automation engineer with about three years of experience building workflow automations, API and webhook integrations, and LLM agents for real users. At FlowSpace, built GTM and support automations in n8n (lead routing, enrichment, data sync), AI support agents that answer against live platform data and escalate to a person on low confidence, an LLM ingestion pipeline with human review (900+ listings drafted), and OfficeRnD and Nexudus integrations over REST, OAuth and webhooks. Led the migration off a legacy stack to Next.js and Laravel (2,000 to 4,500+ users). Daily practitioner with Claude Code, TypeScript, Python and SQL databases.
