Prabhavit Gupta

AI Engineer: Agent Workflows, Orchestration & Enterprise Integrations

+39 349 718 1904 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (EU / Remote / Relocation Ready)

Summary

AI Engineer and Lead Developer with 3 years of hands-on production experience architecting autonomous agent runtimes, enterprise workflow automations, and data-intensive integration infrastructure. Deep practical expertise taking complex business processes from discovery to production deployment—combining orchestration tools (n8n, Make), modern LLM agent frameworks, and custom Python/TypeScript microservices. Specialized in schema-enforced tool execution, deterministic validation loops, webhook synchronization across mission-critical SaaS platforms, and automated evaluation harnesses analyzing real execution traces. Power user of AI-native developer tooling (Claude Code, Cursor) to rapidly deliver reliable, well-tested production workflows. Holder of an EU Long-Term Residence Permit (permanent unrestricted EU work authorization across all member states without visa sponsorship); based in Venice, Italy and ready for immediate engagement.

Technical Expertise

- **AI Workflows & Agent Engineering:** Autonomous multi-step agents, schema-enforced tool calling, intent routing, prompt engineering, deterministic guardrails, fallback escalation to human operators, evaluation over production transcripts.
- **Workflow Orchestration & Tools:** Advanced n8n workflow pipelines, custom nodes, Claude Code workflows, LangChain, Make, Zapier, Model Context Protocol (MCP) servers, asynchronous queues (Redis, Celery).
- **Integration & API Architecture:** RESTful APIs, GraphQL, webhook event-driven pipelines, OAuth2/OIDC authentication, JSON Schema validation, rate limiting, CRM & enterprise data synchronization.
- **Full-Stack & Backend Engineering:** Python (FastAPI), TypeScript, Node.js, Next.js, PostgreSQL, Supabase, Redis, structured data modeling, ETL data pipelines, Docker containerization.
- **Testing & Reliability:** Automated end-to-end regression testing with Playwright, CI/CD automated deployment pipelines, logging and trace observability, error monitoring, incident triage.
- **Languages & Authorization:** English (C1 Professional), Hindi (Native), Italian (Beginner). EU Long-Term Residence Permit (permanent unrestricted EU work authorization, no visa sponsorship required).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer & AI Systems Architect *London, UK (remote)*

- Architected, deployed, and maintained the production AI customer support and workflow automation runtime serving 4,500+ active enterprise users across pricing, venue inventory, and multi-location bookings.
- Grounded AI agent responses against live operational databases and partner APIs (OfficeRnD, Nexudus) using strict JSON tool schemas and deterministic validation, eliminating hallucinated answers.
- Built automated evaluation loops analyzing real customer conversation transcripts rather than synthetic benchmarks, systematically detecting failure patterns and establishing deterministic fallback escalation paths.
- Engineered resilient webhook listeners and data synchronization pipelines connecting platform datastores with external CRM systems and scheduling tools, maintaining 99.9% uptime.
- Profiled latency and API token consumption across model versions, optimizing prompt templates and context window utilization to reduce inference costs while maintaining sub-second response times.
- Deployed automated end-to-end regression test suites using Playwright, verifying API contracts and continuous deployment stability across end-to-end customer booking flows.
- Spearheaded platform migration from legacy architecture to a modern Next.js and backend service stack, supporting platform growth from 2,000 to 4,500+ users without operational degradation.

Urlink **Apr 2025 - Jul 2025**
Project Manager & Solutions Developer (Freelance) *Barcelona, Spain (remote)*

- Managed client discovery and solution architecture for bespoke web applications, defining technical specifications, API contracts, and integration milestones.
- Built automated validation and data synchronization pipelines connecting third-party services to PostgreSQL datastores, eliminating manual entry and ensuring strict relational integrity.
- Established CI/CD deployment routines and automated quality checks to accelerate delivery cycles for client deliverables.

Independent Technical Consultant **Aug 2023 - Feb 2024**
AI Solutions & Automation Engineer *Venice, Italy*

- Designed and delivered tailored automation workflows, web data extraction engines, and API integrations for European SME clients using Python, TypeScript, and modern orchestration tools (n8n, Make).
- Replaced fragmented, manual spreadsheet operations with robust event-driven integrations featuring automatic retry queues, dead-letter alerts, and structured audit logs.
- Conducted hands-on technical onboarding, client stakeholder demos, and workflow training, achieving high user adoption across newly automated operational processes.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous grounding in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
