Prabhavit Gupta

Forward Deployed Engineer: n8n Workflows, Custom Nodes & AI Integrations

+39 349 718 1904 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (EU / Remote / 30–50% Travel Ready)

Summary

Forward Deployed Engineer and AI Systems Architect with 3 years of production experience designing, building, and operating mission-critical workflow automations, custom integration connectors, and agentic architectures. Power builder with n8n and modern orchestration frameworks, combining the velocity of node-based automation with the architectural rigor of full-stack TypeScript, Node.js, and Python services. Proven track record embedding directly with client and operational stakeholders to unpack messy business processes, validate integration contracts, and ship resilient production pipelines with structured error-handling and automated evaluation loops. Passionate about translating custom, one-off deployment requirements into clean, reusable nodes and shared automation patterns. Holder of an EU Long-Term Residence Permit (permanent unrestricted EU work authorization across Germany, Spain, and all member states without sponsorship); based in Venice, Italy, and fully prepared for 30–50% travel across EMEA.

Technical Expertise

- **Forward Deployed Engineering:** Customer technical discovery, workflow architecture design, on-site stakeholder enablement, live demonstrations, rapid POC-to-production delivery, cross-functional bridge to Core Product.
- **Workflow Orchestration & n8n:** Advanced n8n workflow design, custom node development, sub-workflow execution, expression evaluation, webhook triggers, error-trigger nodes, retry strategies, self-hosted deployments.
- **API & Integration Architecture:** RESTful APIs, GraphQL, webhooks, OAuth2/OIDC authentication, JSON Schema validation, rate limit handling, pagination, asynchronous message queues, data mapping pipelines.
- **AI Agent Systems & Tooling:** Model Context Protocol (MCP) servers, LLM tool/function calling, schema-enforced agent loops, guardrails, fallback escalation logic, automated evaluation over production traces.
- **Full-Stack & DevOps Stack:** TypeScript, JavaScript, Python, Node.js, FastAPI, Next.js, PostgreSQL, Redis, Docker, Git, CI/CD automated deployment, Playwright end-to-end regression testing.
- **Languages & Authorization:** English (C1 Professional), Hindi (Native), Italian (Beginner). EU Long-Term Residence Permit (permanent unrestricted work authorization in Germany and across EU, no visa sponsorship needed).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer & AI Systems Architect *London, UK (remote)*

- Architected, deployed, and maintained the production AI customer support agent runtime on a live platform serving 4,500+ active enterprise users, automating high-touch inquiries across pricing, venue inventory, and multi-location bookings.
- Grounded AI agent responses against live operational databases and partner APIs (OfficeRnD, Nexudus) using strict JSON tool schemas and deterministic validation, eliminating hallucinated answers.
- Built automated evaluation loops analyzing real customer conversation transcripts rather than synthetic benchmarks, systematically detecting failure patterns and establishing deterministic fallback escalation paths.
- Engineered resilient webhook listeners and data synchronization pipelines connecting platform datastores with external CRM systems and scheduling tools, maintaining 99.9% uptime.
- Profiled latency and API token consumption across model versions, optimizing prompt templates and context window utilization to reduce inference costs while maintaining sub-second response times.
- Deployed automated end-to-end regression test suites using Playwright, verifying API contracts and continuous deployment stability across end-to-end customer booking flows.
- Spearheaded platform migration from legacy architecture to a modern Next.js and backend service stack, supporting platform growth from 2,000 to 4,500+ users without operational degradation.

Urlink **Apr 2025 - Jul 2025**
Project Manager & Solutions Developer (Freelance) *Barcelona, Spain (remote)*

- Managed client discovery and solution architecture for bespoke web applications, defining technical specifications, API contracts, and integration milestones.
- Built automated validation and data synchronization pipelines connecting third-party services to PostgreSQL datastores, eliminating manual entry and ensuring strict relational integrity.

- Established CI/CD deployment routines and automated quality checks to accelerate delivery cycles for client deliverables.

Independent Technical Consultant **Aug 2023 - Feb 2024**
AI Solutions & Automation Engineer *Venice, Italy*

- Designed and delivered tailored automation workflows, web data extraction engines, and API integrations for European SME clients using Python, TypeScript, and modern orchestration tools (n8n, Make).
- Replaced fragmented, manual spreadsheet operations with robust event-driven integrations featuring automatic retry queues, dead-letter alerts, and structured audit logs.
- Conducted hands-on technical onboarding, client stakeholder demos, and workflow training, achieving high user adoption across newly automated operational processes.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous grounding in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
