Prabhavit Gupta

Technical Solutions Engineer: AI Pipelines, Client Delivery & Data Systems

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (EU Permanent Resident / Remote Contract Ready)

Summary

Technical Solutions Engineer with 3 years of hands-on experience bridging customer requirements and production technical architecture across enterprise AI, data ingestion pipelines, and automated workflow integrations. Proven track record leading client-facing technical discovery, translating ambiguous business requirements into robust solution designs, and configuring multi-stage data pipelines using Python, RESTful APIs, and modern LLM evaluation metrics (precision, recall, F1, grounding). Experienced managing end-to-end implementation lifecycles from pre-sales technical scoping through deployment and incident response. Holder of an EU Long-Term Residence Permit (permanent unrestricted EU work authorization across all EU member states, no sponsorship required); based in Venice, Italy and available immediately for remote freelance contracts.

Technical Expertise

- **Solutions Engineering & Client Delivery:** Technical discovery, requirements elicitation, solution architecture, pre-sales and post-sales technical leadership, customer stakeholder management, cross-functional collaboration with Sales and Product.
- **Data Pipelines & AI Systems:** Python (pandas, NumPy, FastAPI, async patterns), data ingestion, multi-stage transformation workflows, LLM evaluation metrics (accuracy, precision, recall, grounding), prompt engineering, dataset validation.
- **Software Development & System Integration:** TypeScript, Node.js, RESTful APIs, webhook consumers, PostgreSQL schema modeling, Redis asynchronous task queues, JSON schema enforcement.
- **Observability, Quality & Operations:** Incident monitoring, root-cause error analysis, automated end-to-end regression testing with Playwright, Git version control, Docker containerization.
- **Languages & Work Authorization:** English (C1 Professional, fluent), Hindi (Native), Italian (Beginner). EU Long-Term Residence Permit (unrestricted EU work authorization across all EU member states, no visa sponsorship required).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer & AI Systems Architect *London, UK (remote)*

- Architected and deployed production customer-facing AI agents and data processing pipelines for an enterprise platform serving 4,500+ active business users, integrating platform catalogs with external APIs.
- Translated complex stakeholder requirements into concrete technical specifications, building multi-stage validation pipelines that parsed unstructured partner data into validated JSON schemas.
- Implemented evaluation harnesses evaluating system accuracy, grounding, and recall against production transcripts, systematically lowering edge-case error rates and maintaining SLA compliance.
- Monitored live system performance and error logs, identifying incident patterns and deploying rapid patches across TypeScript/Node.js microservices and PostgreSQL data models.
- Built automated integration and regression test suites with Playwright, verifying API contracts and data pipeline integrity across continuous release cycles.

Urlink **Apr 2025 - Jul 2025**
Project Manager & Solutions Developer (Freelance) *Barcelona, Spain (remote)*

- Led client-facing technical discovery and end-to-end delivery of customized web solutions and automated data processing pipelines for European enterprise clients.
- Formulated technical requirements in direct collaboration with client stakeholders and commercial teams, scoping delivery milestones and system integration boundaries.
- Engineered automated data synchronization pipelines using Python and RESTful APIs, connecting third-party partner systems to PostgreSQL datastores with high data consistency.
- Built interactive prototypes and mock environments to validate customer workflows prior to full-scale engineering execution, reducing deployment friction.

Independent Technical Consultant **Aug 2023 - Feb 2024**
AI Automation & Solutions Developer *Venice, Italy*

- Provided technical solutions engineering and automation consulting to European clients, designing customized LLM integrations, document pipelines, and webhook orchestrations.
- Replaced manual data entry operations with automated, multi-stage Python and n8n data flows featuring comprehensive retry logic, error alerting, and structured incident escalation.
- Authored technical architecture documentation, API integration guides, and runbooks to facilitate seamless client handover and ongoing operational support.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous training in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
