Prabhavit Gupta

AI Solutions Engineer: Full-Stack Systems, Agentic Workflows & Production LLM Observability

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (Open to Relocation to Barcelona/Madrid)

Summary

AI Solutions Engineer with 3 years of hands-on experience designing, shipping, and maintaining production AI agents, intelligent workflow automation, and full-stack software architectures. Expert in AI-native development methodologies (daily default power user of Claude Code, Cursor, and MCP), engineering production RAG pipelines (chunking, semantic matching, structured JSON schema validation), and conducting rigorous transcript evaluations (Langfuse) to measure latency, token costs, and accuracy. Proven track record turning ambiguous client challenges into working, production-hardened software deployed with Docker, CI/CD, and asynchronous queue processing. EU Long-Term Residence Permit holder (permanent unrestricted work authorization across Spain and the EU without visa sponsorship). Available immediately.

Technical Expertise

- **Agent Architectures & Tool Calling:** Autonomous agent workflows, MCP (Model Context Protocol), Tool calling with strict JSON Schema/Zod validation, Guardrails, Human-in-the-loop fallback escalation.
- **Production RAG & Context Engineering:** Semantic chunking, Hybrid search, Embedding pipelines, System prompt design, Hallucination elimination via production transcript evals.
- **Full-Stack Engineering & Stack:** TypeScript, JavaScript, Python, Node.js, Next.js, React, RESTful APIs, Webhook architectures, automated testing with Playwright, Git.
- **Infrastructure & Observability:** Trace analysis (Langfuse), Latency profiling & token budgeting, Docker, PostgreSQL, Supabase, Cloud services (AWS/GCP), CI/CD pipelines.
- **AI-Native Development:** Daily default power user of Claude Code, modern agent runtimes, and AI-assisted workflows for rapid prototyping and continuous refactoring.
- **Languages & Authorization:** English (C1 Professional), Hindi (Native), Italian (Beginner). EU Long Term Residence Permit (Permanent unrestricted work authorization in Spain and EU without visa sponsorship).

Experience

FlowSpace.co — **Mar 2024 - Aug 2026**
Lead Developer (Full-time, Freelance) — *London, UK (remote)*

- Built and operated the production AI customer support agent on a platform serving 4,500+ active users, handling live inquiries on pricing, inventory, and bookings.
- Grounded agent responses against live operational databases and partner APIs (OfficeRnD, Nexudus), engineering strict tool-call schemas and fallback logic that escalated to humans on low confidence.
- Evaluated model performance and failure modes against real production transcripts rather than synthetic benchmarks, systematically eliminating hallucinations in inventory and pricing answers.
- Profiled latency and API token consumption across model versions, optimizing prompt templates and context window usage to reduce operational cost while maintaining rapid response times.
- Deployed automated end-to-end test suites using Playwright, verifying API contracts and continuous integration stability across customer booking journeys.
- Spearheaded platform migration from a legacy stack to a modern Next.js and Laravel architecture, scaling capacity from 2,000 to 4,500+ users.
- Built automated data ingestion pipelines that parsed and validated unstructured partner listings, scaling platform inventory to 900+ active locations.

Urlink — **Apr 2025 - Jul 2025**
Project Manager & AI Assisted Developer (Freelance) — *Barcelona, Spain (remote)*

- Architected web application backend workflows, defining clear API contracts, relational schemas, and data transformation logic.
- Implemented automated validation pipelines connecting third-party services with PostgreSQL, preventing malformed inputs and ensuring data consistency.
- Integrated CI/CD workflows and automated regression checks to accelerate feature delivery.

Independent Technical Consultant — **Aug 2023 - Feb 2024**
AI Solutions & Automation Engineer — *Venice, Italy*

- Designed bespoke AI workflows, automated web extraction engines, and API integrations for European SME clients using Python, TypeScript, and Playwright.
- Translated manual, repetitive business operations into automated software solutions with structured logging and error recovery.
- Engineered webhook listeners and real-time synchronization pipelines across CRM and operational tools.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous foundation in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
