# Prabhavit Gupta

Voice AI Engineer: Real-Time Speech (STT/TTS), Low-Latency Voicebots & Agentic Systems

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

## Summary

Voice AI engineer and systems developer based in Venice, Italy with unrestricted European work authorization. Specializing in low-latency conversational AI pipelines, real-time speech architectures (STT to LLM to TTS), and enterprise agentic systems. At FlowSpace, served as Lead Developer engineering customer care agents connected to live APIs with streaming responses and confidence-based human handoffs. Experienced in building streaming audio and text ingestion workflows, latency reduction for sub-2s conversational turn-around, and hybrid cloud integrations; available immediately across the EU/EOR.

## Experience

**FlowSpace.co** • *Lead Developer (Full-time, Freelance)*

Mar 2024 - Aug 2026 • London, UK (remote)

- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review. 900+ listings drafted.
- Streamlined customer support with AI agents that answer queries against live platform data and escalate to a person on low confidence.
- Integrated the OfficeRnD and Nexudus APIs for automated bookings, and built CRM lead-capture integration and GTM automations (sales funnel, lead enrichment, outbound) with n8n.
- Led the migration off a legacy stack to a coded Next.js and Laravel product: mapped the data model, chose the migration path per entity (API or CSV) and drove the cutover. Scaled the platform from 2,000 to 4,500+ users.
- Documented product and business logic with the developer team, coordinated between the internal team and an external agency, and built a commute-time calculator tool for companies.
- *Tools: Claude Code, n8n, Playwright, Postman, Laravel, TypeScript, Supabase, GitHub, Jira, ClickUp, Miro, Google Analytics, Microsoft Clarity*

**Urlink** • *Project Manager & AI-Assisted Developer (Freelance)*

Apr 2025 - Jul 2025 • Barcelona, Spain

- Built automated workflows and structured customer-facing demos with AI agents for client onboarding and document ingestion.
- Managed project delivery end to end: mapped stakeholder requirements, built proof-of-concept prototypes, coordinated testing, and handed over documentation to client teams.
- *Tools: Claude Code, Python, APIs, Postman, Supabase*

**Freelance** • *Full-Stack AI & Automation Developer*

Sep 2023 - Mar 2024 • Venice, Italy

- Built web scrapers, data enrichment pipelines, and custom API integrations for clients across Europe.
- Developed internal tools with modern frontend frameworks and backend scripts, automating repetitive manual data entry.
- *Tools: TypeScript, Python, n8n, Supabase, REST APIs*

**Tractionboard.co** • *Low-Code Developer (Internship)*

Aug 2023 - Oct 2023 • Utrecht, Netherlands

- Integrated ChatGPT/OpenAI and Sendgrid, built responsive designs, debugged features and implemented Google Ads 4.
- *Tools: Figma, Sendgrid, ChatGPT*

## Education

**Ca' Foscari University of Venice** • *Bachelor's in Philosophy, International Studies & Economics, Minor in Entrepreneurship*

Oct 2020 - Jun 2024 • Venice, Italy

## Certifications

Microsoft Copilot Studio Agent Academy • Microsoft: Introduction to building AI agents • Microsoft Power Automate • Tray.AI Build Practitioner (Sep 2024) • Tray.AI Build Foundations

## Additional Information

- **Work authorization:** European Long Term Residence Permit (Italy), EOR ready, no sponsorship needed in EU. Available immediately.
- **Languages:** Hindi (native), English (professional), Italian (beginner).

## Core Skills

- **Voice AI & Speech Architectures:** Real-time STT to LLM to TTS pipelines, streaming audio protocols, conversational latency optimization, voicebot escalation
- **Agent Systems & Production LLMs:** Conversational turn handling, prompt optimization, structured function calling, vector databases (pgvector, Chroma), evaluation baselines
- **Backend Engineering & Cloud:** Python (asyncio, FastAPI), TypeScript, RESTful API design, WebSockets, microservices, cloud deployments
- **Reliability & Performance:** Claude Code, Docker, CI/CD, Git/GitHub, Playwright test automation, regression testing, token and latency profiling
