Dear Aily Labs Hiring Team,

I am writing to apply for the MID AI/ML Engineer role on the AI Platform team. Over the past three years I have built and shipped LLM-driven pipelines that go from raw input to a production-facing result, with a human in the loop where accuracy matters, and I want to bring that same mindset to Aily's decision intelligence platform.

At UltraStrategy, I built the CV-parsing pipeline behind the platform: a user uploads a CV, the pipeline extracts the data with Affinda and scores how relevant that candidate is for specific types of roles, the result is delivered to the frontend, and the pipeline then generates a standardised Ultra CV using the Claude API. I built this with n8n and Eden AI, and tuned the extraction and scoring logic to keep the output consistent as inputs varied, work that sits close to the data to model to deployment loop your team runs.

At FlowSpace, I built and still own an AI listing bot that takes a workspace provider's brochure in any format and drafts a full structured listing with a human in the loop, producing over 900 drafts so far, and I built support AI agents that answer customer queries from live platform data and escalate to a person when confidence is low. Both run in production against real users, not as demos, and both needed API integration, monitoring and iteration to stay reliable at scale.

I also work with Python for automation, scripting and LLM pipeline tasks, alongside API integration and Docker for packaging services, and I am comfortable partnering with data scientists and engineers to turn a working pipeline into something the rest of the team can build on.

I hold an Italian EU Long Term Residence Permit. I am not currently authorised to work in Spain or Germany without the applicable employer side permit or sponsorship process, and I am ready to relocate and complete that process for the Madrid, Barcelona or Munich hybrid role.

I would welcome the opportunity to discuss how I could contribute to the AI Platform team.

Regards,
Prabhavit Gupta
