Dear Hiring Manager,

I am applying for the Forward Deployed Engineer role at Accenture España in Madrid.

At FlowSpace, I took over a live workspace marketplace and automated its data migration off a legacy stack onto Next.js and Laravel, mapping the old structure to the new one, choosing the migration path per entity and driving the cutover while the product stayed live, growing the platform from 2,000 to over 4,500 users. I built and own an AI listing bot that takes a workspace provider's brochure in any format and drafts a full structured listing with a human in the loop, over 900 drafts produced, and support AI agents that ground answers in live platform data and escalate to a human on low confidence. I built these with the Claude API, n8n for orchestration and TypeScript, plus OfficeRnD and Nexudus API integrations and CRM and GTM automations, owning the outcome end to end with a real client rather than a delivery milestone.

At UltraStrategy, I built a CV-parsing pipeline where a user uploads a CV, the pipeline extracts the data with Affinda and the Claude API and scores how relevant the candidate is for specific role types, the result is delivered to the frontend, and a standardised profile is generated with n8n and Eden AI. That multi-provider, multi-tool pipeline, owned end to end and embedded in a real user workflow, is close to the abstraction-layer work this role describes.

I want to be upfront about my background. I have three years of professional experience across eight European companies rather than a long single-employer track record. Your posting says non-linear profiles are expected and assessed on demonstrated deployment experience and outcome ownership rather than CV pattern matching, which is exactly how I would frame my case: hands-on production delivery with real clients, not internal pilots or research projects.

I hold Italian EU long-term resident status. I am not currently authorised to work in Spain and would need the applicable employer-side permit or sponsorship process. I am ready to relocate and complete that process.

Regards,
Prabhavit Gupta
