Dear Hiring Manager,

I am applying for the Forward Deployed Engineer (EMEA) role at Applied Intuition in Munich.

At FlowSpace, I took over a live workspace marketplace and automated its data migration off a legacy stack onto Next.js and Laravel, mapping the old structure to the new one, choosing the migration path per entity and driving the cutover while the product stayed live, growing the platform from 2,000 to over 4,500 users. I built and own an AI listing bot that takes a workspace provider's brochure in any format and drafts a full structured listing with a human in the loop, over 900 drafts produced, and support AI agents that ground answers in live platform data and escalate to a human on low confidence, plus OfficeRnD and Nexudus API integrations and CRM and GTM automations. I owned this end to end, from architecture through to a live product a real client depends on.

At Urlink, I worked as project manager and AI-assisted developer, building the platform and its logic with Next.js, Supabase, Netlify and bolt.new, and implementing automations driven directly by client requirements. Paired with FlowSpace, that is the pattern I would bring to a founding EMEA FDE team: build standalone, production-quality software and stay embedded with the people who use it, rather than hand work off to a delivery layer.

I want to be upfront on tenure. I have three years of professional experience across eight European companies rather than the six or more years listed, but in that time I have owned end-to-end production delivery independently inside a live client environment, including full-stack work from architecture through implementation to rollout, which is the shape of ownership this role asks for. I am comfortable working on-site with customers and travelling regularly.

I hold Italian EU long-term resident status. I am not currently authorised to work in Germany and would need the applicable employer-side permit or sponsorship process. I am ready to relocate to Munich and complete that process.

Regards,
Prabhavit Gupta
