Dear Campari Group hiring team,

I am applying for the Global AI Engineering role in Sesto San Giovanni. I have three years of experience against the 5+ years asked for, and I want to be upfront about that. What I bring instead is density: eight companies in three years, most of it spent shipping generative AI applications, AI agents and LLM data pipelines into production, which is exactly the work this role industrialises.

At FlowSpace, I built and operate an AI listing bot that takes a workspace provider's brochure in any format, PDF, website, photo or spreadsheet, extracts structured data with an LLM, and drafts the full listing with a human review step before it reaches the backend; it has produced over 900 draft listings. I also built support AI agents that answer customer queries from live platform data and escalate to a person on low confidence, shipped API integrations with OfficeRnD and Nexudus for automated bookings, and built CRM and GTM automations for lead capture, enrichment and routing. Alongside that I led the automated migration of the platform off a legacy stack onto Next.js and Laravel while it stayed live, taking it from 2,000 to 4,500+ users.

At UltraStrategy, I built a CV-parsing pipeline integrated into the platform: a user uploads a CV, the pipeline extracts the data and scores how relevant that person is for specific types of roles, the result is shown in the frontend, and a standardised profile is then generated. Affinda and the Claude API handled the parsing and generation, and the extraction tool itself was built with n8n and Eden AI, which is the same prompt engineering and orchestration work this role asks for.

I also built the AI-assisted platform and client automations at Urlink, and integrated Google APIs into AI tools that surface courses, internships and jobs at Get2Germany. My production stack is TypeScript, Python, n8n and LLM APIs, and I use Claude Code daily.

I am authorised to work in Italy with no sponsorship required, and available to start immediately.

Regards,
Prabhavit Gupta
