Dear Hiring Manager,

I am applying for the Forward Deployed AI Engineer (Senior/Principal) role at Cloudera, based in Austria.

At UltraStrategy, I built a CV-parsing pipeline integrated into the platform: a user uploads a CV, the pipeline extracts the data with Affinda, scores how relevant that candidate is for specific role types with the Claude API, the result is delivered to the frontend, and a standardised Ultra CV is generated, orchestrated with n8n and Eden AI. I also built the platform that serves different user profiles. That project is the closest match to what your posting describes as building full-stack AI applications that turn unstructured input into a working enterprise output.

At FlowSpace, I took over a live workspace marketplace and automated its data migration off a legacy stack onto Next.js and Laravel, mapping the old structure to the new one and driving the cutover while the product stayed live, growing the platform from 2,000 to over 4,500 users. I built and own an AI listing bot, brochure to structured listing with a human in the loop, over 900 drafts produced, and support AI agents that answer from live platform data and escalate to a person on low confidence, the same agentic pattern your posting asks a Forward Deployed AI Engineer to take from prototype to production. I built these with the Claude API, n8n and TypeScript, and connected them to real customer systems through OfficeRnD and Nexudus API integrations.

I want to be direct about fit. I have three years of professional experience across eight European companies, not the seven-plus years your posting asks for, and I have not run production AI workloads on enterprise cloud infrastructure at scale. What I bring is hands-on delivery of full-stack AI applications, from data pipeline to a live customer-facing product, and comfort working directly with stakeholders to turn ambiguous requirements into shipped systems.

I hold Italian EU long-term resident status. I am not currently authorised to work in Austria and would need the applicable employer-side permit or sponsorship process. I am ready to relocate and complete that process, or to perform the role remotely from Italy if that is an option.

Regards,
Prabhavit Gupta
