Dear Hiring Manager,

I am applying for the Junior React Front-end Developer role in EY's Technology Transformation Consulting practice in Nicosia.

At FlowSpace, a workspace marketplace, I built user-facing features in React and Next.js with TypeScript, integrated REST APIs against OfficeRnD and Nexudus for live booking data, and wrote Playwright tests to keep releases stable. I also built the interface for an AI listing pipeline that has produced 900+ draft listings for human review, so I have shipped both the UI layer and the API integrations behind it, translating wireframes into working, tested components end to end.

EY's consulting model, where developers work directly inside client delivery teams, is what draws me. I like being close to the people using what I build and adapting quickly to a client's existing codebase and ways of working, which is how I have operated across every project so far.

I am based in Venice, Italy, and ready to relocate to Nicosia for this role. I hold Italian EU long-term resident status, which does not itself grant Cypriot work authorisation, and I would need the applicable employer-side permit process, which I am ready to complete.

Regards,
Prabhavit Gupta
