Dear EY team,

I am writing to apply for the Forward Deployed AI Engineer - Manager role on the FS Technology Consulting, AI and Data team in Dublin. I want to be upfront: I have three years of professional experience, shorter than the five plus years and manager level scope the posting lists, but dense and hands on, across eight European companies, building and shipping the kind of GenAI and agent based systems this role is about.

At FlowSpace, a live workspace marketplace, I took over the platform and automated its data migration off a legacy stack onto Next.js and Laravel, mapping the data model entity by entity and driving the cutover while the product stayed live and grew from 2,000 to 4,500 plus users. I built and own an AI listing bot that takes a workspace brochure in any format, PDF, website, photo or spreadsheet, and drafts a full listing with a human in the loop, 900 plus listings drafted so far. I also built support AI agents that answer customer queries from live platform data and escalate to a person on low confidence, alongside the OfficeRnD and Nexudus booking integrations and the CRM and GTM automations around them.

At UltraStrategy, I built a CV parsing pipeline integrated into the platform: a user uploads a CV, the pipeline extracts the data and scores how relevant that person is for specific roles, the result reaches the frontend, and a standardised Ultra CV is generated. Affinda and the Claude API handled the parsing and generation, and n8n and Eden AI built the extraction tool itself.

I am hands on by habit, comfortable carrying a solution from concept through to something a client can actually run, and I use Claude and Claude Code daily as part of how I build. I hold Italian EU long-term resident status. I am not currently authorised to work in Ireland and would need the applicable employer-side permit or sponsorship process. I am ready to relocate and complete that process.

I would welcome the opportunity to discuss how I could contribute to your Financial Services AI and Data team.

Regards, Prabhavit Gupta
