Dear Hiring Manager,

I am applying for the QA Engineer, Automation Tester role at GRiT Solutions.

At FlowSpace I built and ran end to end tests with Playwright across the web app and its APIs, using Postman to validate endpoints and SQL against Supabase and PostgreSQL to check the data behind them. I wrote the validation checks that gate our LLM listing pipeline before any of its 900 plus drafted records reach a human reviewer, and I evaluated our RAG based support agents for correctness and failure recovery before launch. Python is my main automation language, and I keep steady Git and CI habits on every change. My hands on QA tools are Playwright and Postman rather than Selenium or Cypress, but the underlying skills, locators, waits, assertions, and test data setup, transfer directly.

GRiT's mix of client delivery and a genuine automation practice is what draws me. I am based in Venice, Italy, and ready to relocate to Lisbon. I hold Italian EU long term resident status, so I am not yet authorised to work in Portugal and would need the employer side permit process, which I am ready to complete.

Regards,
Prabhavit Gupta
