Dear Hiring Manager,

I am applying for the Staff Forward Deployed Engineer, AI-Native Software Development role at JetBrains, based in Berlin.

At FlowSpace, I took over a live workspace marketplace and automated its data migration off a legacy stack onto Next.js and Laravel: I mapped the old structure onto the new one, chose the migration path per entity, API endpoints or CSV exports, and drove the cutover while the product stayed live, growing the platform from 2,000 to over 4,500 users. I also built and own an AI listing bot, brochure to structured listing with a human in the loop, over 900 drafts produced, plus support AI agents that answer from live platform data and escalate to a person on low confidence, wired into OfficeRnD and Nexudus through API integrations. I built all of this with the Claude API, n8n and TypeScript, the same combination of agent execution, shared context and governance your JetBrains Central platform asks a Forward Deployed Engineer to deploy for customers.

At Urlink, I worked as project manager and AI-assisted developer on a client-facing platform build in Barcelona: I built the platform and its logic with AI-assisted development, implemented automations driven directly by client requirements, and sat across the table from the client translating their needs into working software, on Next.js, Supabase, Netlify, GitHub and bolt.new. That mix of technical build and direct client ownership is close to what your posting describes as acting as a trusted advisor to customer engineering teams and consulting partners.

I want to be direct about fit. I have three years of professional experience across eight European companies, not the ten-plus years a Staff or Principal title usually implies. What I bring is hands-on delivery of AI agents and platform migrations into a live, customer-facing product, and comfort working directly with stakeholders to turn ambiguous requirements into shipped systems. I am ready to travel to meet customers and to relocate anywhere in the EU for this role.

I hold Italian EU long-term resident status. I am not currently authorised to work in Germany and would need the applicable employer-side permit or sponsorship process. I am ready to relocate and complete that process.

Regards,
Prabhavit Gupta
