Dear Kyndryl Hiring Team,

I am writing to apply for the Forward Deployed Engineer role in Milan. I have three years of experience across eight European companies, embedding directly with product and customer teams to build AI systems that reach production, and the delivery-first shape of this role, learning consulting fundamentals through direct customer exposure while shipping real components, is exactly the kind of growth I am looking for.

At FlowSpace, I took over a live marketplace and automated its migration off a legacy stack onto Next.js and Laravel, mapping the old data structure to the new one and driving the cutover while the product stayed live, growing the platform from 2,000 to 4,500 plus users. I also built and still own an AI listing bot that takes a workspace provider's brochure in any format and drafts a full structured listing with a human in the loop, producing over 900 drafts so far, and I built support AI agents that answer customer queries from live platform data and escalate to a person when confidence is low, work close to the agentic AI and production deployment focus of this role.

At UltraStrategy, I built the CV parsing pipeline behind the platform: a user uploads a CV, the pipeline extracts the data with Affinda and scores how relevant that candidate is for specific types of roles, the result is delivered to the frontend, and the pipeline then generates a standardised Ultra CV using the Claude API. I built this with n8n and Eden AI.

I work with Python, TypeScript and Node.js day to day, use Git and GitHub for version control, and I am comfortable picking up new cloud and orchestration tools quickly, as I did moving from a low code background into this stack over the past three years. I am looking for a role where I keep learning from senior engineers while owning real delivery, which is how I would describe this one.

I hold an Italian EU Long Term Residence Permit and am authorised to work in Italy without sponsorship, based in Venice and ready to work from Milan.

I would welcome the opportunity to discuss how I could contribute at Kyndryl.

Regards,
Prabhavit Gupta
