Dear Hiring Manager,

I am applying for the Forward Deployed AI Engineer role at Lleverage in Amsterdam.

At FlowSpace, I took over a live workspace marketplace and automated its data migration off a legacy stack onto Next.js and Laravel, mapping the old structure to the new one, choosing the migration path per entity and driving the cutover while the product stayed live, growing the platform from 2,000 to over 4,500 users. I built and own an AI listing bot that takes a workspace provider's brochure in any format, PDF, website, photo or spreadsheet, and drafts a full structured listing with a human in the loop, over 900 drafts produced, plus support AI agents that ground answers in live platform data and escalate to a person on low confidence. I built these with the Claude API, n8n for orchestration and TypeScript, and connected them to real customer systems through OfficeRnD and Nexudus API integrations, the same mix of prompts, tools and data your FDE team combines into working agents.

At UltraStrategy, I built a CV-parsing pipeline where a user uploads a CV, the pipeline extracts the data with Affinda and the Claude API and scores how relevant the candidate is for specific role types, the result is delivered to the frontend, and a standardised profile is generated with n8n and Eden AI. That project needed the same resourcefulness your posting describes: unfamiliar systems, undocumented data shapes and a working solution at the end.

I want to be direct about fit. I have three years of professional experience across eight European companies, comfortable with APIs, authentication and data transformations, and coding daily in TypeScript. I have not worked against on-premise ERPs specifically, but I have investigated unfamiliar customer systems and troubleshot integration issues end to end, and I am comfortable learning a new system quickly.

I hold Italian EU long-term resident status. I am not currently authorised to work in the Netherlands and would need the applicable employer-side permit, a TWV work permit filed by the employer, or sponsorship process. I am ready to relocate to Amsterdam and complete that process.

Regards,
Prabhavit Gupta
