Dear Hiring Manager,

I am applying for the AI Solutions Engineer (Fashion) role at Metyis' Porto Digital Campus.

At FlowSpace, I built AI solutions end to end for a live marketplace platform. I built an LLM extraction pipeline turning provider documents, in formats from PDFs to websites and spreadsheets, into structured, validated listings, with human review before production. I also built RAG backed support agents answering customer queries against live platform data, with confidence based escalation to a human when unsure, improving accuracy through ongoing evaluation. My stack is Python, SQL, and Supabase and PostgreSQL, and I have carried features from requirements through to rollout, working with the internal team, an external agency, and end users.

Metyis' Digital Campus model, embedding AI engineers inside a real retail business rather than running AI as a side project, is the environment I want next: close to the data, judged on production impact rather than demos.

I am based in Venice, Italy, and ready to relocate to Porto. I hold Italian EU long term resident status, am not currently authorised to work in Portugal, and would need the applicable employer side permit process, which I am ready to complete.

Regards,
Prabhavit Gupta
