Dear Hiring Manager,

I am applying for the Forward Deployed Full Stack Engineer role at NestAI in Helsinki.

At FlowSpace, I took over a live workspace marketplace and automated its data migration off a legacy stack onto Next.js and Laravel, mapping the old structure to the new one and choosing the migration path per entity while the product stayed live, growing the platform from 2,000 to over 4,500 users. On top of that I shipped OfficeRnD and Nexudus API integrations for automated bookings, built support AI agents that ground answers in live platform data and escalate to a human on low confidence, and built an AI listing bot that takes a workspace provider's brochure in any format and drafts a full structured listing with a human in the loop. That mix of full-stack ownership, backend integration work and operational AI tooling is close to what this role describes: build and adapt web applications and backend integration layers directly against a live, complex environment.

At Urlink, I worked as an AI-assisted developer building the platform and its logic on Next.js and Supabase, implementing automations against a client's own requirements as they came in and acting as the point of contact for what the client actually needed next. That direct, fast-turnaround way of working with a non-technical client is close to the "jump into unfamiliar codebases, connect disparate systems" way this role is described.

I have three years of professional experience across eight European companies, most of it as an embedded, client-facing developer working directly with non-technical stakeholders and small delivery teams rather than inside a large in-house engineering org. I am comfortable moving between TypeScript, Node.js and Python depending on what a project needs, and I lean on AI-assisted development day to day to move quickly without cutting corners on quality.

I hold Italian EU long-term resident status. I am not currently authorised to work in Finland and would need the applicable employer-side permit or sponsorship process. I am ready to relocate to Finland and complete that process, and I am comfortable with the occasional travel to client sites this role describes.

Regards,
Prabhavit Gupta
