Dear Nordea Forward Deployed AI team,

I am writing to apply for the Senior Forward Deployed AI Engineer role on your Forward Deployed AI team. I want to be upfront about where I stand: I have three years of professional experience, not the longer track record a senior title usually implies. What I can offer instead is dense, shipped work across eight European companies in that time: a live production migration for a real client, client-driven automations, an LLM data-parsing pipeline, and API integration work, each one delivered end to end rather than as a prototype.

At FlowSpace, a live workspace marketplace, I took over the platform and automated its data migration off a legacy stack onto Next.js and Laravel, mapping the data model entity by entity and driving the cutover while the product stayed live and grew from 2,000 to 4,500 plus users. I also built and own an AI listing bot that takes a workspace brochure in any format, PDF, website, photo or spreadsheet, and drafts a full listing with a human in the loop, 900 plus listings drafted so far, and I built support AI agents that answer customer queries from live platform data and escalate to a person on low confidence.

At UltraStrategy, I built a CV parsing pipeline integrated into the platform. A user uploads a CV, the pipeline extracts the data and scores how relevant that person is for specific roles, the result is shown in the frontend, and a standardised Ultra CV is then generated, using Affinda and the Claude API for the parsing and generation, and n8n and Eden AI for the extraction tool itself.

I use Claude and Claude Code daily in my own workflow, and I am comfortable working close to the business, turning an ambiguous AI use case into a scoped, production ready solution. I hold Italian EU long-term resident status. I am not currently authorised to work in Finland and would need the applicable employer-side permit or sponsorship process. I am ready to relocate and complete that process.

I would welcome the opportunity to discuss how I could contribute to the Forward Deployed AI team.

Regards, Prabhavit Gupta
