Dear Quento Technologies hiring team,

I am applying for the AI Solutions Specialist, FDE II role. I build production AI systems end to end, from prototype to a deployed feature a real customer uses, which is the shape of work this role asks for.

At FlowSpace, I am the lead developer on a live coworking marketplace. I built an AI listing bot on the Claude API and n8n that takes a workspace brochure in any format and drafts a full listing with a human in the loop, over 900 produced so far, and support AI agents that answer customer queries from live platform data and escalate to a person on low confidence. I also automated the marketplace's migration off a legacy stack onto Next.js, Laravel and Supabase while the product stayed live, and the platform grew from 2,000 to over 4,500 users.

At UltraStrategy, I built a CV-parsing pipeline integrated into the platform. A user uploads a CV, the pipeline extracts the data with Affinda and the Claude API and scores how relevant that candidate is for specific role types, the result is shown in the frontend, and a standardised Ultra CV is then generated. That pipeline used n8n and Eden AI and had to run reliably in production, not just in a demo.

I hold Italian EU long-term resident status and am not yet authorised to work in Greece. The employer would need to file the applicable permit or sponsorship process, and I am ready to relocate to Athens and start immediately.

Regards,
Prabhavit Gupta
