Dear Hiring Team,

I am writing to apply for the Specialist in Integrations role within SEB Global Services' Digital Solutions unit in Vilnius. Administrating integration setups that keep banking systems talking to each other, and automating the repetitive parts of that work, is close to what I have been doing for the past three years.

At FlowSpace, a workspace marketplace platform, I built and maintained integrations with OfficeRnD and Nexudus for automated bookings, connected our CRM to capture and route leads automatically, and set up GTM automations for the sales funnel. I also helped migrate the platform off its legacy stack onto a coded Next.js and Laravel system while it stayed live, work that demanded the same accuracy and attention to detail that integration work across multiple systems requires. Alongside that I worked directly with an internal team and an external agency, so I am used to collaborating across groups to solve problems quickly.

I hold Italian EU long term resident status. I am not currently authorised to work in Lithuania and would need the applicable employer side permit or sponsorship process, which I am ready to complete. I am also ready to relocate to Vilnius for this role.

I would welcome the chance to bring this integrations experience to SEB's Digital Solutions team.

Kind regards,
Prabhavit Gupta
