Dear Hiring Manager,

I am applying for the Product Owner role in SSE Airtricity's Data and Analytics team. Owning a data product end to end, from roadmap to release, is exactly how I already work.

At FlowSpace, I held the product logic and business logic together with our development team and acted as the point of contact between the internal team and an external delivery agency, translating business needs into a working backlog. I shipped the OfficeRnD and Nexudus booking integrations and a CRM integration that consolidated leads and automated capture, prioritising each piece of work against what the business actually needed next. I also helped scale the platform from 2,000 to 4,500+ users through iterative product development, which meant constantly re-testing assumptions against real usage data.

SSE Airtricity's data and analytics mandate, building self-serve capabilities and machine learning models that give customers and the business real insight into energy use, is the kind of product ownership I want to keep doing: close to the data, close to the stakeholders, and accountable for what ships.

I am based in Venice and ready to work 50% of the week from the Dublin office. I hold Italian EU long-term resident status. I am not currently authorised to work in Ireland and would need the applicable employer-side permit or sponsorship process, which I am ready to complete.

Regards,
Prabhavit Gupta
