Dear Hiring Manager,

I am applying for the Senior Forward Deployed Engineer, Italian Speaking role at Salesforce in Milan.

At FlowSpace, I built support AI agents that answer customer queries by grounding responses in live platform data and escalate to a human when confidence is low, alongside an AI listing bot that takes a workspace provider's brochure in any format and drafts a full structured listing with a human in the loop, over 900 drafts produced. I built these with the Claude API, n8n for orchestration and TypeScript, iterating on prompts and escalation thresholds to keep outputs reliable in production, on a live marketplace that I migrated off a legacy stack onto Next.js and Laravel while it stayed live, growing from 2,000 to over 4,500 users. I also shipped OfficeRnD and Nexudus API integrations for automated bookings and CRM and GTM automations for lead capture, enrichment and routing.

At UltraStrategy, I built a CV-parsing pipeline where a user uploads a CV, the pipeline extracts the data with Affinda and the Claude API and scores how relevant the candidate is for specific role types, the result is delivered to the frontend, and a standardised profile is then generated with n8n and Eden AI. That is the same shape of problem this role asks for: taking an agentic pipeline from a working prototype to something a real customer relies on in production.

I want to be direct about where I am not yet a full match. I have three years of professional experience, not four or more, my degree is in Philosophy, International Studies and Economics rather than Computer Science, and I have not worked inside the Salesforce platform itself, Agentforce, Apex or LWC. What I bring is hands-on production experience integrating LLMs, building agent logic and orchestration, and owning outcomes end to end with a real client, which I believe transfers directly. My English is professional working proficiency and my Italian is conversational, not fluent, though I work comfortably in Italian day to day.

I am an Italian EU long-term resident, authorised to work in Italy without sponsorship, and available to work from Milan.

Regards,
Prabhavit Gupta
