Dear Sia team,

I am writing to apply for the Forward Deployed Engineer role. I have three years of professional experience across eight European companies, most of it spent doing exactly what this role asks for: turning a client need into a working LLM based system and staying with it until it delivers real value.

At FlowSpace, a live workspace marketplace, I took over the platform and automated its data migration off a legacy stack onto Next.js and Laravel, mapping the data model entity by entity and driving the cutover while the product stayed live and grew from 2,000 to 4,500 plus users. I built and own an AI listing bot that takes a workspace brochure in any format, PDF, website, photo or spreadsheet, and drafts a full listing with a human in the loop, 900 plus listings drafted so far. I also built support AI agents that answer customer queries from live platform data and escalate to a person on low confidence, alongside the OfficeRnD and Nexudus booking integrations and the CRM and GTM automations around them.

At UltraStrategy, I built a CV parsing pipeline integrated into the platform: a user uploads a CV, the pipeline extracts the data and scores how relevant that person is for specific roles, the result reaches the frontend, and a standardised Ultra CV is generated. Affinda and the Claude API handled the parsing and generation, and n8n and Eden AI built the extraction tool itself.

I am comfortable working directly with clients on site, iterating quickly with stakeholders, and I use Claude and Claude Code daily as part of how I build. I am open to relocating to Paris. I hold Italian EU long-term resident status. I am not currently authorised to work in France and would need the applicable employer-side permit or sponsorship process. I am ready to relocate and complete that process.

I would welcome the opportunity to discuss how I could contribute to your Applied AI team.

Regards, Prabhavit Gupta
