Dear Wave Group team,

I am writing to apply for the Forward Deployed Engineer (FDE) role. I have three years of professional experience across eight European companies, most of it spent as the technical bridge between a product and the customer using it, building and deploying rather than only advising.

At FlowSpace, a live workspace marketplace, I took over the platform and automated its data migration off a legacy stack onto Next.js and Laravel, driving the cutover while the product stayed live and grew from 2,000 to 4,500 plus users. I also built and own an AI listing bot that turns a workspace brochure in any format into a drafted listing with a human in the loop, 900 plus drafted so far, and I built support AI agents that answer customer queries from live platform data and escalate to a person on low confidence, production agentic behaviour under real traffic rather than a demo.

At UltraStrategy, I built a CV parsing pipeline integrated into the platform, using Affinda and the Claude API for the parsing and generation and n8n and Eden AI for the extraction tool, so a user's CV becomes a scored, structured result and a standardised Ultra CV.

I speak professional English and conversational Italian, and I am comfortable turning what I learn from one deployment into a playbook the next one reuses. I hold Italian EU long-term resident status. I am not currently authorised to work in Spain and would need the applicable employer-side permit or sponsorship process. I am ready to relocate and complete that process.

I would welcome the opportunity to discuss how I could contribute to Wave Group's client deployments.

Regards, Prabhavit Gupta
