Dear Hiring Manager,

I am applying for the Product Owner, Data role at Worldline in Bucharest.

At FlowSpace, a workspace marketplace platform, I worked as a product engineer and owned three products end to end, from discovery through rollout. I built an LLM-driven listing pipeline that has produced over 900 draft listing records for human review, turning a workspace provider's raw brochure or website into a structured, validated listing. I built RAG-backed support agents that answer customer queries against live platform data and escalate to a human on low confidence. I also delivered OfficeRnD and Nexudus integrations for automated bookings. Across all three, I wrote the specs, planned the backlog, and ran iteration directly with operators, engineers and an external agency, turning priorities into a working delivery plan.

Worldline's Data Office portfolio, with its mix of strategic steering, governance and cross-team delivery, is the same shape of work at a much larger scale, applied to payments data, which is what draws me to the role.

I am based in Venice, Italy, hold an EU Long Term Residence Permit, and am ready to relocate to Bucharest. I do not currently hold Romanian work authorisation and would need the employer-side permit process.

Regards,
Prabhavit Gupta
