Dear Hiring Manager,

I am applying for the Sales Engineer role in Lisbon.

At FlowSpace, a workspace marketplace, I worked as a customer-facing product engineer, not a career sales engineer, but the work overlaps closely with this role. I ran discovery conversations with coworking operators, understood their booking and CRM setups, then built and demoed the integrations that made the platform work for them, including OfficeRnD and Nexudus API and webhook connections for automated bookings. I also demoed an AI listing pipeline that drafts workspace listings from any source document, and RAG-backed support agents that answer customer queries against live platform data with confidence-based escalation to a human. My stack is Next.js, Laravel and Supabase, with JSON and webhooks as daily tools, not theory.

Zendesk's move toward AI agents in support is exactly the product I want to be presales for, technical enough to need a real builder in the room, customer-facing enough to reward someone who has run discovery and rollout.

I am based in Venice, Italy, and ready to relocate to Lisbon. I hold Italian EU long-term resident status, so I would need the employer-side work permit process for Portugal, which I am ready to start.

Regards,
Prabhavit Gupta
