Summary

AI-augmented full-stack engineer who ships end-to-end features in production SaaS environments using Claude Code and Cursor as primary development tools. At FlowSpace I built the company's AI data pipeline (document ingestion, LLM extraction, structured validation, human-in-the-loop review) and migrated a live marketplace from a legacy stack to a coded TypeScript and Laravel product, scaling from 2,000 to 4,500+ users. I use AI coding assistants daily to accelerate development, reduce boilerplate, and focus engineering time on architecture and correctness. I also built Urlink, a client SaaS platform from scratch, owning requirements, database design, and deployment. I work independently, own features end-to-end from backend services through frontend interfaces, and thrive in environments that value autonomy and iterative delivery.

Skills

- **AI-augmented development:** Claude Code (primary dev tool), Cursor, AI-assisted prototyping and iteration, AI coding assistants for accelerated development and code review, Claude and OpenAI API integration, prompt engineering, agentic orchestration, structured outputs and evaluation loops
- **Full-stack & data:** TypeScript, React, Next.js, Node.js, PostgreSQL, Supabase, PHP (Laravel), REST API design, SaaS architecture, complex API orchestration (rate limits, OAuth, retries, webhooks), Python scripting, end-to-end feature ownership from database schema through UI
- **Infrastructure & process:** Docker, AWS (S3, Lambda), Git, GitHub Actions, CI/CD pipelines, n8n workflow automation, agile iterative delivery, code review, technical design sessions, production troubleshooting

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
