Summary

AI engineer who builds LLM agents in Python and TypeScript and keeps them reliable in production. At FlowSpace I built an agentic document pipeline (tool calling, structured outputs, retrieval, human-in-the-loop) that processed 900+ records while the platform grew from 2,000 to 4,500+ users, plus RAG-backed support agents with confidence scoring and escalation, evaluated against real transcripts. Working knowledge of Docker, Kubernetes and LangChain. Advanced English, open to relocating to Porto, available immediately.

Skills

- **AI agents & LLM engineering:** Python agent pipelines (tool calling, structured outputs, memory, guardrails, human-in-the-loop), prompt engineering, RAG, LLM evaluation and regression testing, Claude and OpenAI APIs, LangChain (working knowledge), n8n, Claude Code
- **Backend & integrations:** Python and TypeScript services, REST APIs, webhooks, OAuth, retries and rate limits, PostgreSQL, Supabase, Node.js, Laravel, deterministic pipeline tests, Playwright
- **Deployment & operations:** Docker and Kubernetes (working knowledge), Vercel, GitHub Actions, monitoring of agent runs, turning stakeholder requirements into agent workflows

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
