Summary

I build production AI agents that automate real business workflows on live marketplaces, with human-in-the-loop review where risk demands it. At FlowSpace I built an agentic pipeline that ingests documents in any format (PDFs, web pages, photos, spreadsheets), orchestrates LLM calls with tool use and retrieval patterns to extract and validate structured data, and pushes results to a PostgreSQL backend after human review. I own systems end to end: I design, build, deploy, monitor, and iterate based on real production data and failure modes. I code daily in Python and TypeScript.

Skills

- **AI agents & automation:** production agentic workflows (Claude and OpenAI APIs), tool-use orchestration, retrieval-augmented generation, multi-step agent orchestration, structured-output extraction, confidence scoring, human-in-the-loop review systems, monitoring and alerting, agentic coding (Claude Code)
- **Languages & platforms:** Python, TypeScript, JavaScript, Node.js, SQL, Docker, REST APIs, webhooks, PostgreSQL, Supabase, AWS, Git, GitHub Actions, CI/CD
- **Marketplace & integrations:** API integrations (booking systems, CRM pipelines, payment flows), n8n workflow automation, data transformation and validation pipelines, working directly with operations and commercial teams

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline for a live coworking marketplace: ingests documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, validates against the platform schema, and pushes results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), working directly with operations and commercial teams.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
- Owned systems end to end: designed, deployed, monitored, debugged failures, and iterated based on real production data and user feedback.
