Summary

Applied AI engineer who designs and ships production agentic systems for enterprise clients. At FlowSpace I built an AI data pipeline that ingests documents in any format (PDF, web page, photo, spreadsheet), runs multi-stage LLM extraction with tool-use orchestration and retrieval, validates outputs with confidence scoring and evals, and pushes clean results to the backend after human-in-the-loop review. I also built RAG-backed support agents with observability and escalation logic, and integrated booking systems, CRMs, and payment APIs into production workflows. I ship daily in Python, TypeScript, and Node.js, use Claude Code and Cursor as my default development tools, and treat AI as an engineering discipline: CI/CD, testing, structured outputs, and eval loops are how I keep systems reliable. I am comfortable in consulting-style environments, translating between business problems and technical solutions, and working directly with clients from scoping through delivery.

Skills

- **Applied AI & LLM engineering:** Python, LLM API integration (Claude, OpenAI), agentic orchestration, tool-use workflows, RAG pipelines with retrieval quality monitoring, structured outputs, confidence scoring, evals and observability, Claude Code, Cursor
- **Full-stack engineering:** TypeScript, Node.js, React, Next.js, PHP (Laravel), PostgreSQL, Supabase, REST API design, end-to-end feature ownership across backend, data layer, and UI
- **Production infrastructure:** Docker, AWS, Git, GitHub Actions, CI/CD, API integrations (Stripe, booking systems, CRM pipelines), n8n workflow automation, data extraction and transformation pipelines

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
