Summary

Full-stack engineer who builds AI-powered product experiences from possibility to production. At FlowSpace I built an AI listing pipeline turning documents in any format into structured records via LLM APIs and human review (900+ records), plus RAG-backed support agents that escalate on low confidence. I led a live-product migration off a legacy stack onto coded Next.js and Laravel, scaling from 2,000 to 4,500+ users, and shipped booking, CRM, and payment integrations. I work across TypeScript, Python, and PHP, applying AI throughout the development process to move fast without cutting corners. I simplify relentlessly, fixing shared primitives when the same failure recurs.

Skills

- **AI-native engineering:** Agentic orchestration (tool calling, human-in-the-loop review), Claude and OpenAI API integration, prompt engineering, RAG, LLM fine-tuning and evaluation
- **Full stack, end to end:** TypeScript (frontend and backend), React, Next.js (App Router, SSR, server components), Node.js, PHP (Laravel), Python (AI pipelines, scripting), PostgreSQL, Supabase, REST APIs, Docker, GitHub Actions
- **Systems & integrations:** API orchestration (rate limits, OAuth, retries, webhooks), third-party integrations (CRM, booking, payment), production monitoring, live-platform migration and data-model mapping

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
