Summary

AI automation engineer who builds production agents and automated workflows end to end. At FlowSpace I designed and shipped an AI data pipeline that orchestrates LLM agents with tool use, structured output parsing, and retrieval to ingest documents in any format and push validated results to production after human review. I built integrations against third-party APIs (booking systems, CRMs, payment platforms), designed human-in-the-loop approval workflows, and implemented evaluation and monitoring for agent accuracy, latency, and cost. I work across Python, TypeScript, and PHP/Laravel, and I build with AI daily using Claude Code as my primary development tool. I hold Microsoft Copilot Studio and Power Automate certifications.

Skills

- **AI & automation:** AI agent orchestration, LLM API integration (OpenAI, Claude/Anthropic), prompt engineering, structured output parsing, function calling and tool use (MCP-style patterns), RAG pipelines, workflow automation (n8n), Microsoft Copilot Studio, Power Automate, confidence scoring, guardrails, human-in-the-loop review, evaluation harnesses
- **Backend & integrations:** Python, TypeScript, PHP/Laravel, REST API design and consumption, SaaS API integrations, webhooks, background jobs, queues, retry and rate-limit handling, PostgreSQL, MySQL, Redis, Supabase
- **Infrastructure:** Docker, GitHub Actions CI/CD, AWS (EC2, S3, CloudWatch), Vercel, automated testing (Jest, Playwright), production monitoring, Agile/Scrum

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that orchestrates multi-step LLM agents with tool use, structured output parsing, and retrieval to ingest documents in any format (PDF, web page, photo, spreadsheet) and push validated results to production after human review. Handles hundreds of sources with different formats.
- Designed human-in-the-loop workflows with schema validation, approval gates, and escalation paths so non-technical staff could safely review and approve AI outputs before they reached production.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), managing rate limits, webhooks, and retry logic across service boundaries.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
