## Summary

Engineer who builds AI-assisted development workflows and the small Python utilities around them. Claude Code is my daily tool for repository analysis, code summaries, documentation and review, and I know where AI output has to be checked. At FlowSpace I built an agentic document pipeline (Python, TypeScript, LLM APIs) with structured outputs, retrieval and human review that processed 900+ records while the platform grew from 2,000 to 4,500+ users. Working knowledge of Docker, Kubernetes basics and LangChain. Careful, documented way of working. Open to relocating to Szeged.

## Skills

- **AI development tooling:** Claude Code (daily), Cursor, prompt engineering and prompt packs, Claude and OpenAI APIs, RAG-style retrieval, structured outputs, validating AI-generated code and docs, LangChain (working knowledge), n8n
- **Python & automation:** Python scripts and lightweight services, repository and log parsing, extraction pipelines, GitHub and GitLab APIs, webhooks, Markdown docs automation, deterministic tests, TypeScript, PostgreSQL
- **Platform basics:** Git, CI/CD (GitHub Actions), Docker, Kubernetes and Helm basics, Linux shell, handover notes and architecture documentation

## Experience

**FlowSpace.co** **Mar 2024 – Aug 2026**
*Full-Stack & AI Engineer (Full-time, Freelance)* *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
