Summary

AI solutions engineer who builds and deploys agentic systems for client-facing delivery. At FlowSpace I built an AI pipeline that ingests documents in any format (PDF, web page, photo, spreadsheet), runs multi-stage LLM extraction with tool-use orchestration across Claude and OpenAI, validates outputs with confidence scoring and automated evals, and pushes clean results to the backend after human-in-the-loop review. I also built RAG-backed support agents with retrieval quality monitoring and escalation logic, and integrated booking systems, CRMs, and payment APIs into production workflows. I build daily with Claude Code and work across TypeScript, Node.js, React, Next.js, Supabase, and Python. I have hands-on experience with MCP connectors, structured outputs, prompt engineering, and n8n workflow automation. I ship fast, work directly with clients from scoping through delivery, and turn ambiguous business problems into working AI solutions.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
