Summary

At FlowSpace I built and owned the marketing and GTM automation layer end to end, replacing manual workflows with reliable automated systems using n8n, Claude and OpenAI. I connected CRM (Attio), outbound (Amplemarket), payments (Swan) and booking platforms (OfficeRnD, Nexudus) into pipelines that served a revenue team daily. I also built AI agents in production that draft content from raw data, extract structured information from any format, and escalate to a human on low confidence. I think in systems that keep running without me watching.

Skills

- **Marketing automation & AI workflows:** n8n (primary tool), Make.com, Zapier, AI-powered content drafting and data extraction pipelines, prompt engineering, human-in-the-loop review systems, workflow documentation
- **CRM & integrations:** Attio (CRM administration, pipeline management, reporting), REST APIs, webhooks, third-party integrations (Amplemarket, Swan, OfficeRnD, Nexudus, Google, Sendgrid), data flows across systems
- **AI platforms:** Claude (daily driver), OpenAI/GPT-4, LLM APIs in production, AI agents for customer support and content generation
- **Languages & data:** TypeScript, JavaScript, Node.js, Python, SQL, PostgreSQL, Supabase, Next.js, React, Laravel (PHP)

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations. These workflows served the revenue team daily and replaced hours of manual work.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), uses an LLM to extract and draft the full listing, validates the output, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled it from 2,000 to 4,500+ users.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
