Summary

Full-stack product engineer who owns features end to end in Next.js, TypeScript, and Node.js. At FlowSpace I built the company's AI data pipeline (document ingestion, LLM extraction with validation, human-in-the-loop review) and built third-party integrations against booking systems, CRM platforms, and payment providers, iterating quickly on customer feedback. I also migrated a live SaaS marketplace from a legacy stack to a coded Next.js and Laravel product, scaling from 2,000 to 4,500+ users. I built Urlink, a client platform from scratch, owning requirements, database design, integrations, and deployment. I work autonomously in remote, async environments, ship fast in early-stage ambiguity, and take full ownership from backend logic through polished UI.
